

Brash Product Development Inc is looking for talented industrial design interns to join our Ottawa studio for a paid internship. Work periods last for 4 month, to 16 month periods. Interns are full working members of our multi-faceted team and their input is much appreciated. Ideal candidates will have a good understanding of usability, manufacturing techniques, materials as well as good problem solving skills and the ability to work with a large team.

What You'll Do

- Work with, and develop; industrial design, UX, visual design, and engineering team members to create seamless design solutions
- Actively research design solutions and user applications
- Concept exploration for diverse projects
- Contribute to client presentations
- Model making

What You'll Bring

- 3+ years as an Industrial Design student
- Exhibit sound problem solving skills, strong attention to detail, an innate sense of good aesthetics, strong communication, uniqueness and passion
- A portfolio that demonstrates concept exploration, innovative solutions, and communicates problem solving skills
- 3D modeling skills – preferably Rhino, Solidworks or Alias
- Confidence with 2D and 3D design visualization tools

At Brash our goal is simply to design and develop the best possible products through great design and engineering. Our philosophy is simple, deliver insightful designs with a great deal of passion and understanding behind them. We work closely with our clients, delivering a range of information to help educate and inform in the development of desired products or services.

Please send a copy of your resume and portfolio to rohan@brashinc.com.
