

At Brash our goal is simply to design and develop the best possible products through great design and engineering. Our philosophy is simple, deliver insightful designs with a great deal of passion and understanding behind them. We work closely with our clients, delivering a range of information to help educate and inform in the development of desired products or services.

Brash is currently looking for an Industrial Design Intern and a UX/UI intern for Summer 2022. Positions would start in May and would extend to the end of August or beyond, if desired.

Requirements:

- 3+ years as an Industrial Design student
- Exhibit sound problem solving skills, strong attention to detail, an innate sense of good aesthetics, strong communication, uniqueness and passion
- A portfolio that demonstrates concept exploration, innovative solutions, and communicates problem solving skills
- 3D modeling skills – preferably Fusion 360, Solidworks or Rhino
- Proficiency in Adobe Suite, UI/UX tools such as Figma and Sketch
- Confidence with 2D and 3D design visualization tools especially rendering skills using Keyshot
- Detail-oriented with a creative approach to design and engineering
- A high degree of autonomy and independence
- Ability to learn and adapt quickly

Responsibilities:

- Development of industrial design, user experiences, visual design and marketing
- Actively research design solutions and user applications
- Design the user experience of physical and software products
- Collaborate with a team of engineers to optimize technical specifications and assembly
- Design hardware components and testing jigs
- Collaborate with Tooling Engineers and Suppliers in the design, manufacturing and qualification of design tooling
- Collaborate with our cross functional team in the selection of materials to meet performance, dimensional and cosmetic requirements for new products
- Contribute to client presentations
- Model making
