

Jr. Designer
Cervélo
Job ID #85770

Job Purpose (accountabilities):

To support the Cervélo Product Design Team with the creation of 3D CAD models, as well as provide support in the development of documentation including manuals and presentations.

Responsibilities:

Provide CAD modelling support for Design Team (40%)

- Assist product designers in the creation of 3D CAD Models of new product designs.
- Support the team with revisions and alterations throughout the design process.

Create concepts and final CAD for supplementary Cervélo parts and accessories (30%)

- Take input from design team and research if needed to develop concept sketches for Cervélo branded products.
- Develop concepts further in CAD, potentially up to final design stage if needed.
- Communicate design to manufacturer through use of 3D CAD, sketches, 2D drawings and presentations.
- Follow design process through to final approval with vendor.

Support product design team with the production of user manuals and assembly instructions (20%)

- Work with design team to determine the build instructions for new product.
- Create technical illustrations/renderings and exploded views.
- Layout instructions in a clear concise manner.
- Perform subsequent updates of the technical documentation as needed.

Support Product Launches with the development of content for presentations and documents (10%)

- Take input from the design team and create content that match the Cervélo Brand Guidelines and present material in a clear and concise manner.
