

COURSE OUTLINE IDES 4400A • INTERNSHIP FIELD REPORT • Fall (2022)

Instructor: Rob Watters

RobertWatters@cunet.carleton.ca

Location: **446 Azrieli Pavilion**

Office Hours: By appointment only

Teaching Assistant: Leaha Lonzi

LeahaLonzi@cmail.carleton.ca

Office Hours: By appointment only

Course Time and Location: This course is asynchronous and self-guided. Please see the schedule of deliverables in Appendix A and continue to monitor Brightspace for any changes.

Course Description

Work experience related to industrial design. Following the internship period (to be approved by the Director), a comprehensive report describing observations and insights will be submitted. Graded Sat or Uns.

Includes: Experiential Learning Activity.

Prerequisite(s): IDES 3300 or IDES 3310 or permission of the School of Industrial Design.

Tutorial hours arranged.

Learning Outcomes

By the end of this course, students will be able to:

1. Write a comprehensive report in a 4-week period.
2. Utilize writing strategies including those associated with preparing, organizing, and formatting materials.

3. Edit reports based on feedback.
4. Demonstrate understanding of the relationship between the theory and practice of industrial design learned in the School of Industrial Design and the experience of working in a professional design-related environment the student has explored.
5. Orally present the highlights of a report in a 3-minute presentation.

Course Deliverables

These are the deliverables for this course. Please see 'Appendix A Course Schedule' for more detailed information.

- Final Paper reflecting upon your internship and education (with staged development deliverables)
- A video of the report highlights.

Student Access to Quiz, Test and Exam Papers

Examinations are for evaluation purposes only and will not be returned to the student.

Required Materials

Materials required for the course are listed below. You may be asked by your instructor to refer to Brightspace for a more comprehensive list of required materials.

- Writing and note taking materials to support the development of your thoughts and ideas
- Your laptop and associated software for writing the report
- Hardware to allow you to record audio and video along with simple video editing software

Computer Requirements

Please refer to the computer requirements on the School of Industrial Design Website. You may be asked by your instructor to refer to Brightspace for other information or requirements related to computer work.

<http://www.id.carleton.ca/undergraduate/about-the-bid-program/computer-requirements>

Individual/Group Work

Courses may include individual and group work. It is important in collaborative work that students clearly demonstrate their individual contribution.

Review/Presentation Attendance

Attendance at scheduled SID Reviews/Presentations is mandatory. These are equivalent to exams when indicated in the course outline. Failure to attend the Review/Presentation without reasonable cause, will result in a grade of F. Students arriving late for the Review/Presentation or not remaining for the complete session without approval from the instructor, will be addressed on a case-by-case basis at the discretion of the instructor.

If you are not able to attend a Review/Presentation, foresee arriving late or need to leave before it is complete, please email your instructor in advance explaining the reason for the situation. It is important that you provide a reasonable rationale for your absence, late arrival or early departure. In the event of an illness or death in the family, you will be required to sign a form verifying your claim and this form is available through the SID administration office.

Late Submission of Lecture & Studio Deliverables

Students who do not hand in deliverables on time will have their earned grade reduced by 10% per day up to a maximum of 3 days.

Participation and Professionalism

Active participation and professional conduct (e.g. class discussion, consultations with instructors, work ethic, etc.) are important in lecture and studio courses and may be formally evaluated by a grade.

Professionalism also includes Carleton's Policy on Academic Integrity described in more detail below with links to content which you are required to review.

Academic Integrity

Carleton's Policy on Academic Integrity is available at: <https://carleton.ca/registrar/academic-integrity/> and covers the following topics:

Plagiarism (e.g. submitting work in whole or in part by someone else, failing to acknowledge sources through the use of proper citations when using another's work).

Test and Exam Rules (e.g. attempting to read another student's exam paper, speaking to another student even if the subject matter is irrelevant to the text, using material not authorized by the examiner).

Other Violations (e.g. improper access to confidential information, disruption in classroom activities, misrepresentation of facts for any academic purpose).

This policy governs the academic behavior of students. In industrial design, ideas and concepts come from a multitude of sources and may be modified and utilized in the design and development process. The student should reference such sources appropriately and it is strongly advised that you read Carleton's Policy on Academic Integrity prior to conducting any work at the University.

Requests for Academic Accommodation

You may require special arrangements to meet your academic obligations during the term. For an accommodation request for any of the following topics below, refer to the link provided for more information: <https://students.carleton.ca/course-outline/>

- *Parental Leave*
- *Religious/Spiritual Obligation*
- *Academic Accommodations for Students with Disabilities*
- *Survivors of Sexual Violence*
- *Accommodations for Student Activities*

Student Responsibility

The student is responsible for knowing the content of this course outline; the schedule of classes, assignments, and/or Reviews; and the material that was covered when absent. The studio is a professional environment and students should be working during the scheduled hours.

Unless otherwise arranged, the class will meet during scheduled class hours. Please note that attendance is important since issues and questions may be raised in class, and announcements made, along with information disseminated through Brightspace. As external professionals are often involved in our work, scheduling changes for guest lectures, presentations, and Reviews may occur at short notice, requiring students to stay informed.

Changes to the Course Outline

The course outline may be subject to change in the event of extenuating circumstances.

Appendix A - Course Schedule

Week	Date	Asynchronous Activity	Brightspace Deliverable
1	Sep 09	Welcome Lecture. Report Skeleton Lecture.	DUE: Quiz in Brightspace
2	Sep 16	Complete the Online Internship Confirmation Survey.	DUE: Survey in Brightspace
3	Sep 23	Technical Reports: Style, formatting and graphics. (Lecture)	DUE: Skeleton of report
4	Oct 14	Final Report is due and shared with your team member.	DUE: Final Report to team member for review (also upload to Brightspace)
5	Oct 21	Marked up Peer Reviewed report returned to your team member.	DUE: Final Report returned to team member (also upload to Brightspace)
6	Nov 4	Final Report is due to instructor.	DUE: Final Report
7	Dec 2	See sample videos	DUE: Final Video upload
