

INTRODUCTION

VARD Marine is a consulting naval architecture and marine engineering company with Canadian operations located in Vancouver and Ottawa, and American operations located in Houston, Texas. The company offers professional ship design, engineering, and shipbuilding technology services to our clients. When we design advanced offshore and specialized vessels, we focus on long term relationships and close cooperation with both ship builders and ship owners.

VARD Marine provides high quality technical support, innovative vessel designs, and new technology applications, including successful European ship design, production and shipbuilding business practices, to the marine community in North America and to selected international markets.

By cooperating with clients to develop state-of-the-art vessels, VARD Marine has earned an outstanding reputation over the years designing and engineering various ships.

PROBLEM STATEMENT

At the moment VARD Marine's ship designs have all different distinct design features. Stakeholders (ship operators, owners, designers, etc) cannot recognize a VARD Marine design from far away. And the average vessel designed by Vard Marine is about 100 metre in length. Couldn't that product be able to be the biggest advertisement board in the world?

Yes, those Vard Marine designs should be the biggest advertisement boards in the world!

GOAL

Develop and implement a strategy to get to a common design feature, which is easily implemented in all VARD ship designs to be able to “recognize Vard Marine designs from afar”.

PROFILE

The perfect candidate is:

- A third or fourth year student;
- A industrial design student;
- A top class student;
- Interested in ships or shipbuilding;
- Capable of handling conflicting interests from third parties;
- A team player, cooperative, proactive and outgoing;
- Fluent in English (spoken and written).

LOCATION, TERMS AND CONDITIONS

The candidate will be working with several engineering professionals in the Ottawa Office on 85 Albert Street, Ottawa, Ontario Canada.

The pay will be industry standard and depending on your experience and year that you are in your studies.

You will get an opportunity to style and bring consistency in the Vard Marine designs while working with top notch engineers.

HOW TO APPLY

Send your motivation as well as your resume to the undersigned.

Rienk Terweij,
