

Internship Job Description

Industrial Designers Robert Galloway-Blackburn and Andrew Kent have joined forces in an effort to bring to market a number of long-simmering product ideas primarily related to people who spend extended periods of time under rough conditions outdoors. Our experience has included such items as load carriage, protective, environmental and mobility equipment. In the course of our careers we have identified a number of projects we believe to be well suited for a third or fourth year ID student. With the aim to develop a sellable, profitable product, it is our intention to guide and direct the successful applicant through one, some, or all of the following tasks:

- Market research,
- Concept ideation,
- Solution Modelling,
- Technical writing and illustration,
- Sourcing,
- Administrative tasks.

In terms of candidates we are looking for someone with an interest in the general subject matter and who is willing and equipped to work as a paid independent consultant. Although we will guide, advise and direct as necessary, we want someone who can take responsibility for a task and deliver on time without excessive supervision. In addition to a basic core competency in the design arts the ideal candidate will:

- Seek and accept responsibility,
- Possess an entrepreneurial spirit,
- Communicate effectively,
- Practice self-discipline,
- Think critically and have an open mind,
- Use personal initiative to solve problems,
- Not be afraid to request guidance,
- Employ reason and logic to make sound and timely decisions,
- Enjoy learning and accept constructive criticism,
- Pursue perfection, yet meet deadlines,
- Have humility and empathy,
- Appreciate humour.

Interested candidates should apply with a link-free PDF no larger than 3 MB consisting of:

1. A resume (max. one page, letter/A4, Landscape)
2. A cover letter explaining specifically how they meet any three of the above characteristics (max. one page, letter/A4, Landscape),
3. A portfolio piece illustrating a project they feel best represents their capabilities (max. one page, letter/A4, Landscape).

Candidates who are selected will be asked to attend a remote interview (date TBD) and supplied with 10 questions they should be prepared to discuss during that interview.

Thank you for your interest, send replies to:
