

## PRODUCT DESIGNER

<b>Position Type:</b>	Permanent, Full-time.
<b>Start Date:</b>	ASAP
<b>Hours of Work:</b>	37.5 hours per week
<b>Job Location:</b>	Cornwall, Ontario
<b>Requirements:</b>	Completed Degree in Relevant Field

### POSITION SUMMARY

Laminacorr Industries is a fast-growing team that aims to become a world-class manufacturer of innovative corrugated plastic product. With an initial focus on the packaging and display industry, Laminacorr is looking for a recent graduate who will design efficient and innovative solutions for its customers.

### QUALIFICATIONS

- Bachelor's degree in Industrial Design other relevant field from an accredited institution
- Oral, reading and writing fluency in English; French an asset.
- Proficiency in ArtiosCAD 18 or earlier.

### DUTIES & POSITION RESPONSIBILITIES

#### Daily Tasks

- Use easy, effective designs to articulate complicated visions.
- Produce convincing 3D mock-up models.
- Create CAD renderings for customers and end-users.
- Prototyping, testing in an industrial setting.
- Develop detailed manufacturing cost for each design project.
- Operate, maintain and troubleshoot a Kongsberg XL cutting table.

## **Teamwork and client service**

- Understand, evaluate and translate user needs and company requirements into desirable, viable and feasible designs.
- Design cost-effective product and work closely with clients to create a competitive product.
- Engage with customers and learn through iterative prototyping.
- Collaborate effectively with internal marketers, customer service and maintenance team.
- Work closely with internal marketers to graphic design product labels, assembly instructions and other marketing materials.
- Build strong, collaborative relationships with our clients.
- Solicit feedback and contribute constructively to design reviews.
- Develop a strong point of view, backed up by design rationale, personal expertise, and industry trends.

## **Innovate**

- Present new product concept and design ideas to management.
- Advise on our current design tools and equipment with the goal of improving our digital standards and capabilities.
- Contribute to brainstorming and determine how to meet latent user needs.
