Supervisors

MDes is an interdisciplinary program where there can be both a supervisor and co-supervisor for the thesis. MDes students must choose a thesis supervisor who is a faculty member at the School of Industrial Design. The co-supervisor is optional and can be any other Carleton faculty member (including SID) or an Adjunct Professor who is a member of SID. An Adjunct Professor may only supervise an MDes thesis as a co-supervisor. If your proposed supervisor does not fit the above description, you must discuss this with the Graduate Program Coordinator before you will be given approval.

Please submit completed form to Brightspace under the [MDes Milestones](#) course.
