Fabrication Specialist

Office Location: Vancouver

About McKinley Studios

McKinley Studios continues to grow. We are looking for a fabrication specialist to join our Vancouver studio. McKinley Studios has a unique interdisciplinary structure that brings architecture, interior design, furniture design, branding, strategy, and art consulting to every project. As a result, our culture is one of exploration, creativity and intense collaboration.

About You

You are a maker. You crave exploration through model-making and prototyping and have a deep interest in materiality as it relates to design and fabrication. Your work with us will range from architectural models in a variety of mediums to prototyping of custom furniture and fixtures. You are an inquisitive self-starter who is also able to lead a small team of students from time to time. You possess excellent collaborative, communication, safety and time-management skills. Ideally you have a background in industrial design with some experience in architectural-model making and are comfortable with the following tools: standard woodshop equipment, 3D printer, laser cutter, CNC machining (wood & metal), welding.

Qualifications

- Experience working in an architectural office
- Industrial design degree or architectural design degree
- Experience with Rhino and Solidworks required
- Experience in Sketchup, Autocad, Shaper 3D an asset

Your Submission

We request that qualified applicants send a resume and portfolio by email to:
