
INFRASTRUCTURE SECURITY AND RESILIENCE: CONCEPTS, PRINCIPLES, THEMES AND CHANGING DYNAMICS

COURSE SUMMARY *(This course is one of the **essential courses** required for **Professional Security Certification under the Infrastructure Resilience Research Group**, Office of the Dean, Faculty of Engineering and Design, Carleton University)*

The objectives of this course is to provide analysts, managers and infrastructure security and resilience practitioners a foundational framework and understanding of the issues and challenges related to all-hazard threats to infrastructure security and resilience in a constantly evolving environment.

Upon completion of this course, participants will be able to:

- Understand the process of developing mitigation solutions to **complex and interdisciplinary issues**
- Perform resilience analysis and examine principles from a **national and international context**
- Identify and analyze **complex threats** and adversaries
- Learn **key concepts** and principles
- Take a leadership role in applying lessons learned in the workplace.
