CONFERENCE VENUE

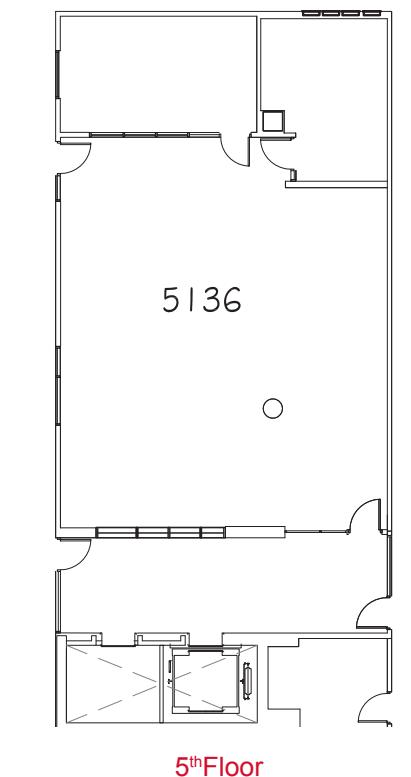

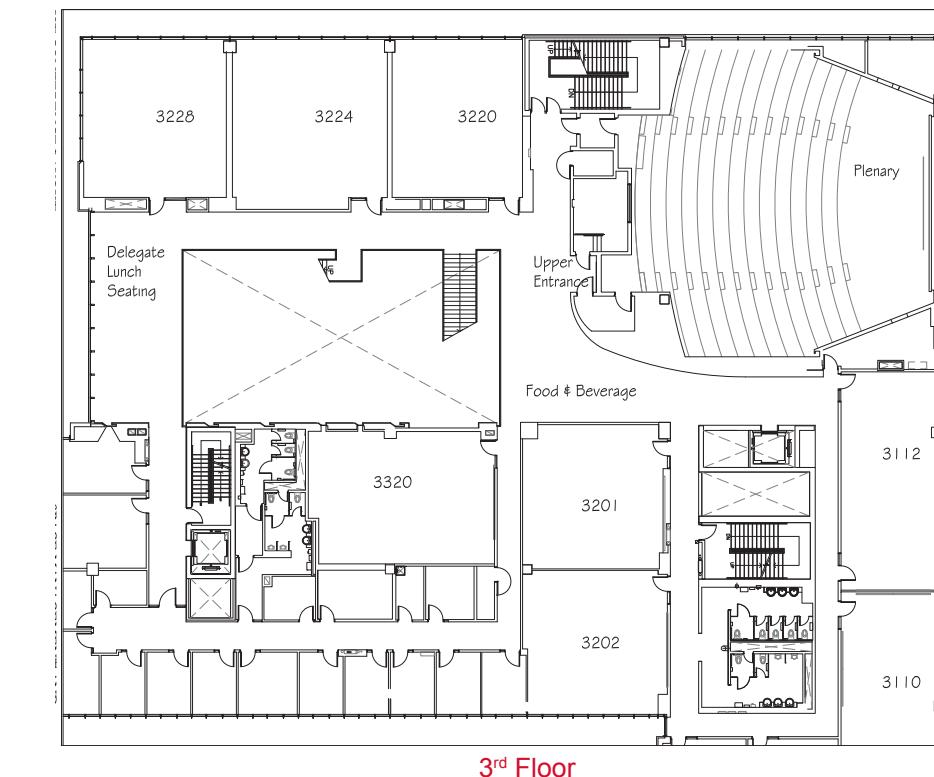

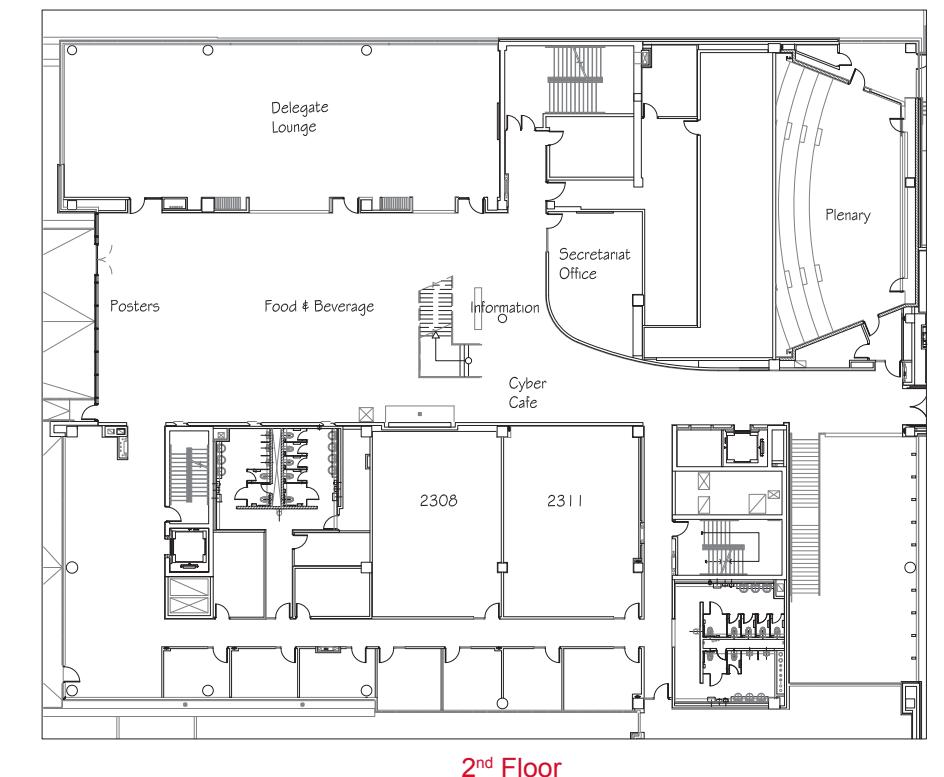

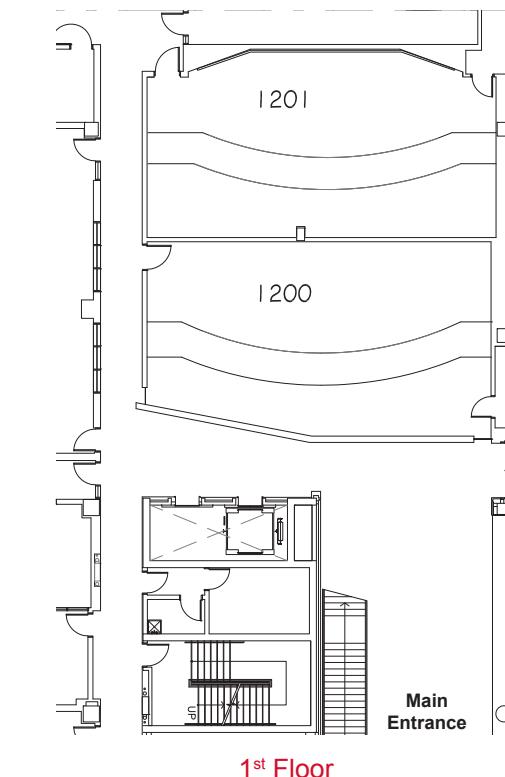

Carleton University is located at 1125 Colonel By Drive.

Richcraft Hall will host all conference day activities. The concurrent sessions will be split between four floors. Only one session room is located on the 5th floor.

Accelerating Sustainability Transitions: building visions, unlocking pathways, navigating conflicts.

The International Sustainability Transitions conference is the major annual gathering of transitions researchers from around the world. Transitions scholarship focuses on transformational change in industries, institutions, socio-technical systems, and communities to promote societal movement towards more sustainable patterns of production and consumption. This 10th Anniversary Conference engages with the theme of Accelerating Sustainability Transitions in the face of difficult political circumstances. It points to the importance of visions, to coordinate efforts and mobilize change. It raises the challenge of mapping out realistic pathways that can link the present with desirable futures. And it emphasizes navigation of the inevitable conflicts that accompany serious efforts at societal change.

Carleton University welcomes you to the 10th Annual International Sustainability Transitions Conference

Thank you to the participants who
took advantage of the carbon offset
arrangement for your air travel. Over 340
tonnes of GHG emissions (equivalent to
~150 intercontinental flights) were offset
through this process. The paper used for
this program insert and other conference
materials are made from recycled paper. Our
lanyards are made from 100% bamboo fibers,
and we would be happy to accept your
badge holder and lanyard for repurposing
at the Information Desk when you depart.

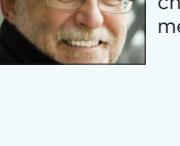

Carleton Dining Services replaced the
cutlery and much of our packaging with
a biodegradable substitute which meets
the ASTM standards for compostability as
certified by the Biodegradable Products
Institute. We participate in the Carleton
University Composting program which
collects all food preparation and post-
consumer waste. Please support this
important initiative by placing all of your
refuse into the properly marked containers.
