

### Conference Unit Installation Instructions

There are **4** cables that need to be attached for the conference unit to work. The diagram is showing the back of the phone. The Side Unit will already be attached to the phone. You will need to connect the cables. Ensure the phone is connected to the network port

- A) Connect the power jumper cable from the side unit into the power port of the phone
- B) Connect the headset cable from the side unit into the headset port on the phone
- C) Plug the conference unit cable into the side unit and into the saucer. [ There is an icon of the saucer to show which port]
- D) Plug the power adapter cable into the side unit and into a power outlet. **[Power adapter is required]**
