

2022-2023 EAST COAST
**SHAKING THE
MOVERS**

April 14-16, 2023

OVERVIEW

- 24 Participants from 11 countries, including Canada
- Ages between 11-18

BACKGROUND

Where do you hear about climate change and environmental issues if you hear about it at all?

- School
- Social Medias

A WORLD FIT FOR US

From

'We are not the problem, we are the solution'

To

**'We as humans are the problem.
The world would be better without us'**

REFLEXIONS

(Youth perspective)

- Canadian culture is part of the problem
- Resources are being misused by governments
- Actions are only taken when it's too late (i.e. COVID)

REFLEXIONS

(Facilitator perspective)

- General feeling of discouragement and of being helpless and powerless

'They say we are the solution and the future of the next generations but they don't even listen to us'

'I worry that we won't even be able to have kids. Or not be able to raise them in a healthy and safe environment'

'They don't even listen to scientists, so how could children help if we don't even listen to those who have the knowledge'

SOLUTIONS

- Intergenerational approach
- Actions from governments and decision-makers

THANK YOU
