The speaker: Dr. Jeremy Laliberté, Professor and NSERC CREATE UTILI Program Director, Department of Mechanical and Aerospace Engineering, Carleton University.

Abstract: In this seminar, Prof. Laliberte will provide an overview of Canada’s new RPAS regulations which took effect on 1 June 2019 after a lengthy regulatory development process. This talk will cover the regulatory process, the state of the current regulations, Canadian privacy considerations and special situations applicable to the university research and teaching environment. The new NSERC CREATE UTILI Program (http://www.carleton.ca/utili) was awarded to a team from Carleton, ETS, Sherbrooke, the University of Ottawa and Queen’s University to provide training and research support to new engineers and scientists on the safe and effective operation of Remotely Piloted Aircraft Systems.
