This task is designed to determine how quickly and accurately you can solve addition, subtraction, and multiplication questions. There is one page of each kind of question.

Before starting the task, please complete *all* of the practice questions. For each type of practice question, the first item has been worked out for you.

- Please write your answers in the boxes below the questions.
- You may use the extra space on the page for rough work.
- Try to answer quickly and accurately.
- Ask the experimenter if you are not sure what to do.

You will have 1 minute for each page. You are not expected to finish all of the questions on a page in the time allowed. Your score on this test will be the number of questions done correctly. You will work on the questions from left to right, and then move down to the next row. Do **not** skip any questions. Answer each question as quickly and accurately as possible.

If you do finish a page, **STOP**.

Please do not go on to the next page until you are asked to do so.
