COURSE DESCRIPTION

Critical thinking may be defined, roughly, as the systematic evaluation of beliefs (claims, theories, decisions) by rational standards. No skill is more important to success, whether in university, in one's chosen profession, or simply in making reasonable, well informed decisions in the course of everyday life, than the ability to think critically and logically. It is therefore appropriate that one of your courses should be devoted to improving your critical thinking skills. This is the course.

Unfortunately, there is no mechanical set of rules that can be applied to produce good critical thinking. (If there were, you probably wouldn't need this course.) There are, however, a number of informal methods, techniques and procedures which are very helpful in this task. Extended practice in the use of these techniques will enable you to recognize when an argument is being presented, identify precisely what the premises and conclusion of the argument are, spot any fallacies it happens to commit, and provide an overall evaluation of the argument. As a result of working with these techniques, you should be able to greatly improve your reasoning and critical thinking skills.

REQUIRED TEXT

A course pack, with the title *Philosophy 2003: Critical Thinking*, has been prepared by the Instructor.

This course pack can be purchased at **Haven Books**, located at 43 Seneca Street, (613) 730-9888. Additional readings will be online.

COURSE REQUIREMENTS

There will be two in-class tests, each worth 30% of the overall grade, and a final exam worth 40% of the grade. The final will be held during the exam period. More details will be provided later about the content of these exams, but, in general, the questions on them will be similar to those assigned in class as homework.

HOMEWORK

Practice doing exercises is essential to success in this course. Homework exercises will therefore be assigned for (almost) every class. Although they will not be graded, students are strongly urged to do them on their own before they are done in class.

ATTENDANCE POLICY

Attendance will not be taken, as it is not feasible in a class of this size. However, regular attendance in class is very important and students are fully responsible for material they miss due to absence.
