COLLOQUIUM LECTURE

"PERCEPTION IS ANALOG: THE ARGUMENT FROM WEBER'S LAW"

JACOB BECK
YORK UNIVERSITY

In the 1980s, a number of philosophers argued that perception is analog. In the ensuing years, these arguments were forcefully criticized, leaving the thesis in doubt. This paper draws on Weber's Law, a well-entrenched finding from psychophysics, to advance a new argument that perception is analog.

FRIDAY, OCTOBER 11, 2019
1201 RICHCRAFT HALL
1:00 P.M.

EVERYONE WELCOME!
