I – DESCRIPTION AND STATEMENT OF PURPOSE

This course has two main objectives:

1) Historical

What is philosophy? One way of approaching this question is to investigate its origin. Philosophy was not born yesterday! Indeed, this form of discourse, research and lifestyle of which Plato would later speak as *philosophia* was born in Greece nearly twenty-six centuries ago. In this course, we will examine the historical and political context in which philosophy, as a practice and a discipline, appeared and developed since its birth in the VIth century BC Greece, up until the IVth century AD. This will allow us to grasp the coherence of our Western philosophical tradition while becoming aware of the discontinuities marking its development. Furthermore, not only is philosophy one of the most ancient disciplines taught in university, it is also the source for many others (mathematics, astronomy, physics, psychology, and political science for example). We are looking to grasp, then, how philosophy gave rise to these disciplines and how it distinguished itself from the natural sciences, from religion, myth, poetry, political science or rhetoric (although it is related to all of these practices in some respect).

2) Critical (and existential)

The goal of this course is not purely historical. As we will see, many ancient schools presented themselves as forms of therapy, as a method of caring for the self allowing one to attain happiness. Each school proposed a certain way of life founded on a specific conception of the world and of the human soul. Becoming stoic, sceptic, cynic or epicurean implied a choice and commitment to a particular way of life on the part of the disciple. As a method of caring for the self, ancient philosophy still has lessons to teach us today. This course will, then, allow us to adopt a critical position regarding the (very abstract) contemporary conception of philosophy and to enrich our own philosophical activity.

At the end of this course students will walk away with a solid training in ancient Greek and Roman philosophy, as well as a richer understanding of their own practice as philosophical apprentices.

II - METHODOLOGY

The course will consist of lectures. However, a significant part of the training for this course rests on the attentive reading of the philosophical texts themselves. Students will be told in advance which texts to read before class and are expected to actively take part by asking questions and participating in discussions.

Attendance is mandatory! *If you don't attend class on a regular basis, you will not be successful in this course. Do take that into account before signing up.*

I post my Power Point slides on CU Learn, but these include only my lecture outline and useful quotes (I do not post my personal notes). Thus, the slides are in no way a substitute to the lectures.
