Recent headlines are awash with warnings of the existential threat that Robotics and Artificial Intelligence (AI) pose to humanity. Stephen Hawking, Bill Gates, and Elon Musk are among the most prominent technology and robotics exerts that have publicly warned of such a threat. In a recent open letter more than 1,000 robotics/AI experts called for a ban on offensive autonomous weapons (drones), more commonly termed “killer robots”, arguing that their development would lead to a new robot arms race with potentially dire consequences for humanity. The recent explosion in robotics/AI research and development underscores their concerns. Global investment in robotics/AI is growing rapidly in all areas of the economy including: healthcare, manufacturing, consumer electronics, entertainment, military, transportation, and public safety. MIT roboticist Cynthia Breazeal recently broke crowdfunding records with the announcement of her new “humanized” social robot, Jibo, which she is calling “the world’s first family robot”. Google and most major automobile manufacturers are designing autonomous (driverless) cars, some of which are already sharing the roads with us. No longer science fiction or the stuff of speculation, the robots are here. But a future in which we find ourselves living alongside robots/AIs raises new ethical uncertainties and governance issues ripe for investigation.

Robots are challenging many of our philosophical and ethical notions while suggesting the need for new public policy. Recent revelations regarding the United States’ military drone program has prompted widespread international discussions on “robot ethics” as a means of anticipating the ethical challenges associated with pursuing various robot technologies and deploying them in, and across, societies. A recent international Campaign to Stop Killer Robots was launched with wide press coverage following the release of a UN report on lethal autonomous robots. Recently, academic institutions worldwide have held major workshops (e.g.
robots.law.miami.edu) and are publishing more and more on the field of the social implications of robotics. It is an exciting time to study the social implications of robotics!

What is a robot? What role does design ethics play in the making of robots and of society? Can robots be persons? What would that agency look like? What are the current directions in robot ethics, and robot design, and are they adequate/justifiable? What kinds of relationships ought we to encourage between robots and humans, or robots and robots? What norms, if any, ought to be considered with respect to governing the design of, and interaction with, robots? What might we owe robots in the future?

The goal of this course is to investigate the above questions through an examination of classic and contemporary texts in ethics, philosophy of mind, science and technology studies, human-robot interaction, law, public policy, and a newly emerging area called “robot ethics”. Students will be challenged to consider how philosophical concepts including identity, consciousness, moral agency, personhood, artificial intelligence, and rationality apply to robot ethics. As this course focuses on ethics and policy issues, an emphasis will be placed on examining and developing normative claims for use in policy contexts from the course literature. By engaging public policy documents students will also have an opportunity to examine and critique the application of philosophical concepts in the context of interdisciplinary technology debates.

---

**COURSE LEARNING OBJECTIVES**

Upon successful completion of this course, students will be able to:

1. Explain some of the key issues in robot ethics.
2. Critique course readings using clear argumentation.
3. Justify particular ethical positions using clear argumentation.
4. Compare course readings with reference to key issues in robot ethics.
5. Compare policy options in order to formulate policy recommendations.

---

**COURSE TEXT**

Other **required** course readings (listed in the Class Schedule below) will be posted and available on cuLearn, either in document form (e.x. PDF), or via hyperlink.

---

**PEDAGOGY**

This course does not require any previous training in technology, robotics, or philosophy. The course will consist of a combination of interactive lectures and regular in-class activities and discussions. In addition to the readings a variety of sources will be engaged throughout the course including sci-fi literature, movies, print media and television for framing discussions. Students will be encouraged to draw on all sources to participate in regular in-class discussions and are expected to have completed all readings prior to class.

My goal is to create a highly interactive learning environment. Formal lectures will be discouraged in place of discussions and in-class peer teaching/learning activities such as discussions, debates, and very short presentations. The course has been designed to provide you opportunities to engage the readings critically on a regular basis, in order to get the most out of the course.
1) **Policy Briefs (2 x 30% of overall course grade):** Students will be required to submit two written policy briefs. Details will be distributed in class.

2) **Final Take-Home Exam (40% of overall course grade):** Details will be distributed in class.

**NOTE:** Assignment due dates/times and any associated late penalties will be discussed in class and specified on assignment instructions sheets distributed on cuLearn.

Standing in a course is determined by the course instructor subject to the approval of the Faculty Dean. This means that grades submitted by the instructor may be subject to revision. No grades are final until they have been approved by the Dean.

---

**CLASS SCHEDULE:**

**Sept 4: Setting the Scene: An Intro to Robot Ethics**

1. Class Introduction: Course Syllabus and Reading List

**Sept 7: Labour Day – No Class**

**Sept 14: What’s So Special About Robots?**

**Sept 21: The Imitation Game**

**Sept 28: Social Robots I - Anthropomorphism**

6. Jibo: Jibo.com

**Oct 5: Social Robots II – Personhood**

**Oct 12: Social Robots III – Robot Rights**

Oct 19: Social Robots IV – Gender

16. 1st Policy Brief Assignment Due at Beginning of Class (Hard Copy)

Oct 26: Fall Break – No Class

Nov 2: Social Robots IV - Love and Sex with Robots

17. Levy, D. Excerpt from Love and Sex With Robots

Nov 9: Movie Night

19. To be selected democratically by class vote.

Nov 16: Military Robots I – Setting the Scene

Nov. 23: Military Robots II – Meaningful Human Control

Nov. 30: Military Robots III – The Campaign to Stop Killer Robots

25. TBD.

Dec 7: Autonomous Cars

29. 2nd Policy Brief Assignment Due at Beginning of Class (Hard Copy)
30. Final Take-Home Exam Distributed
Assignments:

Unless specifically told otherwise by their instructors, students:
- must not use a plastic or cardboard cover or paper clips
- must staple the paper (there is a stapler on the essay box)
- must include the following: student name, student number, course number and section, instructor’s name
- No assignments will be accepted after the last day for handing in term work – see dates in next column.
- Assignments handed in through the essay box (just inside the glass doors, Paterson Hall, Floor 3A) must be dropped into the box by 4:15 on a regular business day in order to be date-stamped with that day’s date. Assignments handed in after 4:15 or on a non-business day will be stamped as having been handed in on the next business day.
- Students are required to keep copies of their assignments. If your paper is lost at any point, you will be considered not to have submitted it if you cannot produce a copy immediately on request.

Deferrals for Term Work:

If you miss a final examination and/or fail to submit a final assignment by the due date because of circumstances beyond your control, you may apply for a deferral of examination/assignment. For deferred examinations, you must apply within 5 working days after the scheduled date of your exam. To apply for deferral of a final assignment, you must apply within 5 working days of the last scheduled day of classes. Visit the Registrar’s Office for more information.

Plagiarism:

It is the responsibility of each student to understand the meaning of ‘plagiarism’ as defined in the Undergraduate or Graduate Calendars, and to avoid both committing plagiarism and aiding or abetting plagiarism by other students. (Undergraduate Calendar Academic Regulations, section 14.3, or http://calendar.carleton.ca/undergrad/regulations/academicregulations solventuniversity/acadreguniv14/)

Academic Accommodation:

You may need special arrangements to meet your academic obligations during the term. For an accommodation request the processes are as follows:

Pregnancy obligation: write to your professor with any requests for academic accommodation during the first two weeks of class, or as soon as possible after the need for accommodation is known to exist. For more details visit the Equity Services website: http://www2.carleton.ca/equity/

Religious obligation: write to your professor with any requests for academic accommodation during the first two weeks of class, or as soon as possible after the need for accommodation is known to exist. For more details visit the Equity Services website: http://www2.carleton.ca/equity/

Academic Accommodations for Students with Disabilities: The Paul Menton Centre for Students with Disabilities (PMC) provides services to students with Learning Disabilities (LD), psychiatric/mental health disabilities, Attention Deficit Hyperactivity Disorder (ADHD), Autism Spectrum Disorders (ASD), chronic medical conditions, and impairments in mobility, hearing, and vision. If you have a disability requiring academic accommodations in this course, please contact PMC at 613-520-6608 or pmc@carleton.ca for a formal evaluation. If you are already registered with the PMC, contact your PMC coordinator to send your Letter of Accommodation at the beginning of the term, and no later than two weeks before the first in-class scheduled test or exam requiring accommodation (if applicable). After requesting accommodation from PMC, meet with your professor to ensure accommodation arrangements are made. Please consult the PMC website for the deadline to request accommodations for the formally-scheduled exam (if applicable) at http://www2.carleton.caPMC/new-and-current-students/dates-and-deadlines/

You can visit the Equity Services website to view the policies and to obtain more detailed information on academic accommodation at http://www2.carleton.ca/equity/

Important Dates:

Sept. 2 Classes start.
Sept. 4 Classes follow a Monday schedule.
Sept. 7 Labour Day - University closed.
Sept. 18 Last day for registration and course changes in Fall and Fall/Winter courses.
Sept. 30 Last day for entire fee adjustment when withdrawing from Fall term or two-term courses.
Oct. 12 Thanksgiving Day – University closed.
Oct. 26-30 Fall Break – no classes.
Nov. 24 Last day for tests or examinations in courses below 4000-level before the Final Examination period.
Dec. 7 Last day of classes, Fall term. Last day for handing in term work and the last that day that can be specified by a course instructor as a due date for Fall term courses.
Dec. 7 Last day to withdraw from Fall term courses (academic purposes only).
Dec. 8 No classes or examinations take place. Review classes may be held, but no new material may be introduced.
Dec. 9-21 Final examinations for Fall courses, mid-terms for Fall/Winter courses. Exams are normally held all seven days of the week.
Dec. 21 Take-home exams are due.
Jan. 6 Winter term classes begin.
Jan. 19 Last day for registration and course changes in Winter term classes.
Jan. 31 Last day for entire fee adjustment when withdrawing from winter courses or winter portion of two-term courses.
Feb. 15-19 Winter Break, no classes.
Mar. 24 Last day for tests or examinations in courses below 4000-level before the Final Examination period.
Mar. 25 Good Friday – University closed.
Apr. 8 Last day of Fall/Winter and Winter term classes. Last day for handing in term work and the last that day that can be specified by a course instructor as a due date for term work for Fall/Winter and Winter term courses.
Apr. 8 Last day to withdraw from Fall/Winter and Winter term courses (academic purposes only).
Apr. 9-10 No classes or examinations take place. Review classes may be held, but no new material may be introduced.
Apr. 11-23 Final Examinations. Exams are normally held all seven days of the week.
Apr. 23 Take-home exams are due.
