Description & objective

As a philosophical movement, naturalism eschews the nonphysical and emphasizes scientifically respectable methods of inquiry. The objective of this seminar is to familiarize you with the roots and guises of contemporary philosophical naturalism and with its presence in three particular areas of philosophy—the philosophy of mind, ethics, and epistemology. Particular topics to be discussed include the American origins of contemporary naturalism, its ontological and methodological commitments, the causal closure of the physical domain, reductionist, nonreductionist, and eliminativist forms of physicalism about the mental, the relationship between metaethical realism and naturalism, the autonomy of normative philosophy, and whether a naturalized epistemology vitiates traditional epistemology's reliance on intuition and the *a priori*.

Evaluation

Participation (10% of overall grade): I will keep track of your participation by gauging your degree of preparation for, and willingness to contribute to (via comments and questions) the discussions of the weekly seminar meetings in which you are not giving a presentation.

Presentations (20%+30%=50% of overall grade): For each of two seminar meetings, you will be expected to provide an opening commentary on an assigned reading, and then lead the subsequent discussion in the remainder of that half of the meeting. Your opening

commentary will be based on a 3-4 page (900-1,200 word) paper, which you will submit to me on the day of the meeting.

Final paper (40% of overall grade): Ideally (but not necessarily) based on one of your presentations, your final paper for the seminar should be approximately 15 pages (4,500 words) in length. It is due on the final day of the fall term's examination period, December 22.
