- Faculty of Arts and Social Sciences Teaching Award, Carleton University, 2005
- Best Research Paper, Society for Police and Criminal Psychology, 2005
- Overseas Research Scholarship, University of Liverpool, 1999-2002

## RESEARCH INTERESTS

Research interests currently span four areas:

- Evidence based policing and academic-police partnerships (e.g., how collaborative partnerships can best be formed, maintained, and utilized to solve real-world policing challenges)
- Police use of force and de-escalation, with a focus on identifying factors that influence performance, decision-making, and memory, and the development of training strategies to improve performance, decision-making, and memory
- Police responses to persons in crisis, especially mental health and addictions crises, including the nature of these calls for police service and evaluations of both police and non-police response models
- Investigative psychology, especially the reliability, validity, and usefulness of psychologically-based investigative techniques (e.g., crime scene analysis, geographic profiling, methods used to link serial crimes)
