II Course description

We usually approach the study of politics by focusing on human actors, institutions, values and socioeconomic processes. Without disregarding such approaches this course takes a different perspective. We will look at politics in terms of materials, devices, and objects, studying their interactions with humans and societies. What can we learn about politics if we start with everyday digital objects like a hashtag or meme? Or really big things, such as urban transit megaprojects? How does our view of political struggles change once we take seriously the difference which the properties of things make, such as the viscosity of oil or the design of complex pharmaceutical objects like the morning-after contraceptive pill or the mRNA vaccine? What can we learn about the politics of identity, race and culture if we focus on seriously contested objects like police body cameras or Indigenous art and artefacts held in national museums? Taking a grounded approach that works mostly through case studies, and reading interdisciplinary scholarly research alongside quality journalism and public commentary, in this course we will explore some of the new lines of inquiry which a focus on the politics

of things can open up. We will ask in what ways these inquiries can inform public action and democratic life as well as scientific understanding.

The course has three aims:

- **First**, this course will introduce students to scholarship on the politics of things. How might such a focus provide an empirically grounded, case-rich and materialist perspective on some of the major problems of politics today, such as racial violence, social justice, settler colonialism, and climate crisis?
- **Second**, the course will offer opportunities to hone essential skills for doing political research, such as critical reading, collecting data, crafting arguments, and presenting your findings. Each week a part of the seminar will be dedicated to the discussion of these skills.
- **Finally**, the course will help you choose a particular thing, object or technology and build your own research project around it. In the final two weeks each student will have the opportunity to present their work in progress.

III Course Format

This is an in person class that meets weekly throughout the term. It will also involve offline work, mainly in the form of students making regular forum posts on Brightspace.

IV Learning outcomes

By the end of this class students should be able to:

- Explain the distinctive contribution that a focus on objects and things brings to political analysis
- Understand different ways of studying the politics of things
- Read scholarly texts with a critical eye
- Use key concepts and themes from the course to make sense of developments in wider political and social life.
- Conduct a research project of your own on a particular object of interest.

V Texts

There is no textbook for the course. All required readings will be available either open access or through ARES and/or the University's library system.

VI Assignments and Evaluation

Assignment	Description	Due date	%
1. Attendance & participation	You are expected to do the required readings and come to class ready to discuss them. Your grade will reflect not just your record of attendance but the quality of your participation. There are many ways you can participate meaningfully in class including asking questions; making observations; drawing connections with other readings or themes in the class; engaging with your colleagues.	ongoing	15
2. Forum posts	Four times during the course you should upload to the Brightspace forum a post commenting on one of the readings. Among the things you can do with a post are: ask a question; highlight a strength or weakness in the reading; make a connection to an event or story in the world; or respond to someone else's post. Ideally you will post just	ongoing	10

	before the relevant class, or just after, but that is not a rule. So, you can post on a reading weeks later, up until Dec. 8th .		
3. Quizzes	There will be two quizzes during the course. These will be 'closed book' (ie, no books, screens or study aids). Each quiz will combine multiple choice, short answers and a short essay. A practice quiz will be posted on Brightspace. <i>Duration: 60 mins.</i>	Oct 17 & Nov 21 (in class)	20 per quiz.
4. Project proposal	You will write a proposal for your research paper. This will provide the basis for your presentation at one of the miniconferences. Guidelines for writing the proposal will be posted on Brightspace. <i>Length: 500 words in addition to bibliography.</i>	Due by: Nov 14, 11.59pm.	10
5. Completion of IU plagiarism awareness certificate	Learning how to avoid plagiarism is an essential part of your university career. Learn how to avoid plagiarism by taking this online course (https://plagiarism.iu.edu/index.html). It takes about two hours to complete. Upon completion you will receive a certificate. You must upload this to Brightspace to show you have passed the course.*	Due by Nov 28, 11.59pm	Pass
6. Mini conference presentation	This will be a 10 minute (no more, no less!) presentation of your work in progress in one of the miniconference weeks. Further details will be posted on Brightspace.	Nov 28 or Dec 5	5
7. Research paper	The proposal and presentation will lay the groundwork for a research paper. For this assignment you will identify an object, device or thing and explore some aspect of its politics. As the seminar progresses we will discuss various aspects of the project such as choosing a topic, method, data collection, and analysis. <i>Word length: 3500</i> (not including bibliography). Submit in Word format to Brightspace. Use this format to name your file: Yourfamilyname_researchpaper_FYSM1611 (Note: this must be original work, not already written for another class).	Due by Dec 8, 11.59pm	20
Late penalties: you will lose half a grade if your assignment is handed in the day following the deadline, another half on the second day, and so on.

Requests for Academic Accommodation

You may need special arrangements to meet your academic obligations during the term. For an accommodation request, the processes are as follows:

Pregnancy accommodation: Please contact your instructor with any requests for academic accommodation during the first two weeks of class, or as soon as possible after the need for accommodation is known to exist. For accommodation regarding a formally-scheduled final exam, you must complete the Pregnancy Accommodation Form ([click here](#)).

Religious accommodation: Please contact your instructor with any requests for academic accommodation during the first two weeks of class, or as soon as possible after the need for accommodation is known to exist. For more details [click here](#).

Accommodations for students with disabilities: If you have a documented disability requiring academic accommodations in this course, please contact the Paul Menton Centre for Students with Disabilities (PMC) at 613-520-6608 or pmc@carleton.ca for a formal evaluation, or contact your PMC coordinator to send your instructor your Letter of Accommodation at the beginning of the term. You must also contact the PMC no later than two weeks before the first in-class scheduled test or exam requiring accommodation (if applicable). After requesting accommodation from PMC, reach out to your instructor as soon as possible to ensure accommodation arrangements are made. For more details, [click here](#).

Accommodation for student activities: Carleton University recognizes the substantial benefits, both to the individual student and to the university, that result from a student participating in activities beyond the classroom. Reasonable accommodation will be provided to students who engage in student activities at the national or international level. Please contact your instructor with any requests for academic accommodation during the first two weeks of class, or as soon as possible after the need for accommodation is known to exist. For more information, please [click here](#).

For more information on academic accommodation, please contact the departmental administrator or visit: students.carleton.ca/course-outline.

Sexual Violence Policy

As a community, Carleton University is committed to maintaining a positive learning, working and living environment where sexual violence will not be tolerated. Survivors are supported through academic accommodations as per Carleton's Sexual Violence Policy. For more information about the services available at the university and to obtain information about sexual violence and/or support, visit: carleton.ca/sexual-violence-support.

Academic Integrity

Academic integrity is an essential element of a productive and successful career as a student. Carleton's [Academic Integrity Policy](#) addresses academic integrity violations, including plagiarism, unauthorized collaboration, misrepresentation, impersonation, withholding of records, obstruction/interference, disruption of instruction or examinations, improper access to and/or dissemination of information, or violation of test and examination rules. Students are required to familiarize themselves with the university's academic integrity rules.

Plagiarism

The Academic Integrity Policy defines plagiarism as “presenting, whether intentional or not, the ideas, expression of ideas or work of others as one’s own.” This includes reproducing or paraphrasing portions of someone else’s published or unpublished material, regardless of the source, and presenting these as one’s own without proper citation or reference to the original source. Examples of sources from which the ideas, expressions of ideas or works of others may be drawn from include, but are not limited to: books, articles, papers, websites, literary compositions and phrases, performance compositions, chemical compounds, art works, laboratory reports, research results, calculations and the results of calculations, diagrams, constructions, computer reports, computer code/software, material on the internet and/or conversations.

Examples of plagiarism include, but are not limited to:

- Any submission prepared in whole or in part, by someone else;
- Using ideas or direct, verbatim quotations, paraphrased material, algorithms, formulae, scientific or mathematical concepts, or ideas without appropriate acknowledgment in any academic assignment;
- Using another's data or research findings without appropriate acknowledgement;
- Submitting a computer program developed in whole or in part by someone else, with or without modifications, as one's own; and
- failing to acknowledge sources through the use of proper citations when using another's work and/or failing to use quotations marks.

Use of Artificial Intelligence

Unless explicitly permitted by the instructor in a particular course, any use of generative artificial intelligence (AI) tools to produce assessed content (e.g., text, code, equations, image, summary, video, etc.) is considered a violation of academic integrity standards.

Procedures in Cases of Suspected Violations

Violations of the Academic Integrity Policy are serious offences which cannot be resolved directly with the course's instructor. When an instructor suspects a violation of the Academic Integrity Policy, the Associate Dean of the Faculty conducts a rigorous investigation, including an interview with the student. Penalties are not trivial. They may include a mark of zero for the assignment/exam in question or a final grade of "F" for the course. More information on the University's Academic Integrity Policy can be found at: <https://carleton.ca/registrar/academic-integrity/>.

Intellectual property

Student or professor materials created for this course (including presentations and posted notes, labs, case studies, assignments and exams) remain the intellectual property of the author(s). They are intended for personal use and may not be reproduced or redistributed without prior written consent of the author(s).

Submission and Return of Term Work

Papers must be submitted directly to the instructor according to the instructions in the course outline. The departmental office will not accept assignments submitted in hard copy.

Grading

Standing in a course is determined by the course instructor, subject to the approval of the faculty Dean. Final standing in courses will be shown by alphabetical grades. The system of grades used, with corresponding grade points is:

Percentage	Letter grade	12-point scale	Percentage	Letter grade	12-point scale
90-100	A+	12	67-69	C+	6

85-89	A	11	63-66	C	5
80-84	A-	10	60-62	C-	4
77-79	B+	9	57-59	D+	3
73-76	B	8	53-56	D	2
70-72	B-	7	50-52	D-	1

Standing in a course is determined by the course instructor subject to the approval of the Faculty Dean. This means that grades submitted by an instructor may be subject to revision. No grades are final until they have been approved by the Dean.

Carleton E-mail Accounts

All email communication to students from the Department of Political Science will be via official Carleton University e-mail accounts and/or Brightspace. As important course and university information is distributed this way, it is the student's responsibility to monitor their Carleton University email accounts and Brightspace.

Carleton Political Science Society

The Carleton Political Science Society (CPSS) has made its mission to provide a social environment for politically inclined students and faculty. By hosting social events, including Model Parliament, debates, professional development sessions and more, CPSS aims to involve all political science students at Carleton University. Our mandate is to arrange social and academic activities in order to instill a sense of belonging within the Department and the larger University community. Members can benefit through our networking opportunities, academic engagement initiatives and numerous events which aim to complement both academic and social life at Carleton University. To find out more, visit us on Facebook <https://www.facebook.com/CarletonPoliticalScienceSociety/>.
