Course Basics: aims, objectives, outcomes and organization

PSCI 3703 explores the idea, history and practice of global economic governance. We will study different ways to understand global economic governance, its principal characteristics and historical manifestations, as well as a selection of its current forms of practice. The main aim of the course is to provide students with a sound working knowledge of global economic governance using analytical tools associated with the academic disciplines of International Relations (IR) and International Political Economy (IPE). Specific objectives of the course include familiarizing students with theoretical approaches to global economic governance, with its history, and with contemporary governance practices in select issue areas. Successful completion of this course should enable students to achieve the following learning outcomes:

- you should better understand the principal ideas that inform global economic governance
- you should be able to relate the history of global economic governance to contemporary examples of its form
- you should be able to demonstrate a working knowledge of select features of global economic governance
- you will further develop skills associated with collaborative learning
- you will further develop skills associated with research and scholarship

This course is organized around a lecture-discussion format delivered in-person unless specified in the syllabus. You will prepare for classes by completing the assigned readings, and then participate in discussion using this material together with information delivered in a short lecture at the start of most classes. Students will undertake both collaborative and independent research assignments, and you will be assessed on these efforts in combination with your ongoing contribution to classroom discussion.

Course Assessment Details

Participation: your participation is assessed throughout the entire course. I include here your ongoing contribution to seminar discussions, your participation in the debate and peer review sessions, your contribution to the collaborative case study groupwork, as well as any posts you make to the course discussion board. My expectation is that you will prepare for each seminar and contribute on a regular basis, although not continuously. I also include under participation any meetings you have with me throughout the semester as well as your role (if asked) to facilitate a case study summary. This grading component helps me to assess your comprehension of the material, your collaborative learning skills, and your commitment to the course. I keep notes on your contributions, and I am happy to speak with you about your progress at any time.

Critical review essay: this assignment is a 1500 word essay that reviews a text assigned by me on global economic governance. This year we will be reviewing *The Challenges of Multilateralism*, by Kathryn Lavelle. You will have an opportunity to discuss this work with your peers prior to submitting your review for grading. This grading component helps me to assess your comprehension of the course material as well as your writing skills.

Collaborative case studies: this assignment includes two 2000 word summaries completed during weeks 8-11 that are posted to the appropriate discussion forum in Brightspace on the Friday following the concluding seminar for that topic. I will assign you to work in small groups over two classes for each case study, and each group will have a facilitator to guide discussion and post the summary. Groups will also present their deliberations to the class for feedback before completing and posting the final version. As these are collaborative exercises, they are graded collectively. This grading component helps me to assess your ability to undertake collaborative learning, conduct research and present the results.

SWOT memorandum outline: this assignment is a 500 word outline of your proposed SWOT memorandum that covers a number of its core design elements. It helps me to assess your ability to plan your research and allows me to provide feedback on your chosen subject. This grade is assessed almost entirely on effort, so please devote the necessary time to undertake the preliminary research which it requires.

SWOT memorandum: this assignment is a 2000 word analysis of an arena of global economic governance from the perspective of a stakeholder whose viewpoint you will adopt. Although you will receive direct feedback from me (and your peers) on your ideas, I also encourage you to consult further with me about any issues that arise during the execution of your research. Please note that you cannot use material from other courses unless explicitly approved by the instructor. This grading component helps me to assess your comprehension of the material and your ability to undertake independent scholarly research.

Use of artificial intelligence (AI) and ‘large language models’ such as ChatGPT to generate your essays undermines the learning objectives of this course, which are for you to develop the skills to learn about, engage with and research themes and issues in IPE. Directing a chatbot to do this for you does not help you to learn, although under certain circumstances this could be a step in this process. We will discuss how to use AI appropriately in the course, but I strongly suggest that if you are going to use such a model in the preparation of your assignments, please come and speak with me about doing this in a manner which respects the learning objectives I have set for you.

Warning: if I suspect that you have used a chatbot to generate any of the writing assignments for this course, I will summon you to a meeting where you will have the opportunity to respond to my concerns. Accordingly, I strongly recommend (1) that you consult with me about how to use AI if you intend on doing so, and (2) that you maintain a record of your research notes and any drafts as evidence of your own work in the preparation of these assignments. Failure to produce these if requested, or to convince me

that the work submitted to this course is in fact your own, are grounds to receive a failing grade on any assignment.

Final Review Exercise: this assignment is a set of essays completed in-class during our final meeting of the semester. You will be asked to respond to two questions that you will receive on the Friday prior to the last class, and which ask you to review different elements of the course material. Please note that there is no way to make-up this exercise, so if you are absent this mark is forfeited. This grading component helps me to assess your ability to respond to feedback on previous assignments, and provides me with the opportunity to consider your overall comprehension of the course material.

Further instruction on each element of the course is available on Brightspace, and we will discuss all of my expectations for these assignments in class. Please note that there are penalties for late and/or over-length submissions for all written assignments.

Requests for Academic Accommodation

You may need special arrangements to meet your academic obligations during the term. For an accommodation request, the processes are as follows:

Pregnancy accommodation: Please contact your instructor with any requests for academic accommodation during the first two weeks of class, or as soon as possible after the need for accommodation is known to exist. For accommodation regarding a formally-scheduled final exam, you must complete the Pregnancy Accommodation Form ([click here](#)).

Religious accommodation: Please contact your instructor with any requests for academic accommodation during the first two weeks of class, or as soon as possible after the need for accommodation is known to exist. For more details [click here](#).

Accommodations for students with disabilities: If you have a documented disability requiring academic accommodations in this course, please contact the Paul Menton Centre for Students with Disabilities (PMC) at 613-520-6608 or pmc@carleton.ca for a formal evaluation, or contact your PMC coordinator to send your instructor your Letter of Accommodation at the beginning of the term. You must also contact the PMC no later than two weeks before the first in-class scheduled test or exam requiring accommodation (if applicable). After requesting accommodation from PMC, reach out to your instructor as soon as possible to ensure accommodation arrangements are made. For more details, [click here](#).

Accommodation for student activities: Carleton University recognizes the substantial benefits, both to the individual student and to the university, that result from a student participating in activities beyond the classroom. Reasonable accommodation will be provided to students who engage in student activities at the national or international level. Please contact your instructor with any requests for academic accommodation during the first two weeks of class, or as soon as possible after the need for accommodation is known to exist. For more information, please [click here](#).

For more information on academic accommodation, please contact the departmental administrator or visit: students.carleton.ca/course-outline.

Sexual Violence Policy

As a community, Carleton University is committed to maintaining a positive learning, working and living environment where sexual violence will not be tolerated. Survivors are supported through academic accommodations as per Carleton's Sexual Violence Policy. For more information about the services available at the university and to obtain information about sexual violence and/or support, visit: carleton.ca/sexual-violence-support.

Academic Integrity

Academic integrity is an essential element of a productive and successful career as a student. Carleton's [Academic Integrity Policy](#) addresses academic integrity violations, including plagiarism, unauthorized collaboration, misrepresentation, impersonation, withholding of records, obstruction/interference, disruption of instruction or examinations, improper access to and/or dissemination of information, or violation of test and examination rules. Students are required to familiarize themselves with the university's academic integrity rules.

Plagiarism

The Academic Integrity Policy defines plagiarism as "presenting, whether intentional or not, the ideas, expression of ideas or work of others as one's own." This includes reproducing or paraphrasing portions of someone else's published or unpublished material, regardless of the source, and presenting these as one's own without proper

citation or reference to the original source. Examples of sources from which the ideas, expressions of ideas or works of others may be drawn from include, but are not limited to: books, articles, papers, websites, literary compositions and phrases, performance compositions, chemical compounds, art works, laboratory reports, research results, calculations and the results of calculations, diagrams, constructions, computer reports, computer code/software, material on the internet and/or conversations.

Examples of plagiarism include, but are not limited to:

- Any submission prepared in whole or in part, by someone else;
- Using ideas or direct, verbatim quotations, paraphrased material, algorithms, formulae, scientific or mathematical concepts, or ideas without appropriate acknowledgment in any academic assignment;
- Using another's data or research findings without appropriate acknowledgement;
- Submitting a computer program developed in whole or in part by someone else, with or without modifications, as one's own; and
- failing to acknowledge sources through the use of proper citations when using another's work and/or failing to use quotations marks.

Use of Artificial Intelligence

Unless explicitly permitted by the instructor in a particular course, any use of generative artificial intelligence (AI) tools to produce assessed content (e.g., text, code, equations, image, summary, video, etc.) is considered a violation of academic integrity standards.

Procedures in Cases of Suspected Violations

Violations of the Academic Integrity Policy are serious offences which cannot be resolved directly with the course's instructor. When an instructor suspects a violation of the Academic Integrity Policy, the Associate Dean of the Faculty conducts a rigorous investigation, including an interview with the student. Penalties are not trivial. They may include a mark of zero for the assignment/exam in question or a final grade of "F" for the course. More information on the University's Academic Integrity Policy can be found at: <https://carleton.ca/registrar/academic-integrity/>.

Intellectual property

Student or professor materials created for this course (including presentations and posted notes, labs, case studies, assignments and exams) remain the intellectual property of the author(s). They are intended for personal use and may not be reproduced or redistributed without prior written consent of the author(s).

Submission and Return of Term Work

Papers must be submitted directly to the instructor according to the instructions in the course outline. The departmental office will not accept assignments submitted in hard copy.

Grading

Standing in a course is determined by the course instructor, subject to the approval of the faculty Dean. Final standing in courses will be shown by alphabetical grades. The system of grades used, with corresponding grade points is:

Percentage	Letter grade	12-point scale	Percentage	Letter grade	12-point scale
90-100	A+	12	67-69	C+	6
85-89	A	11	63-66	C	5
80-84	A-	10	60-62	C-	4
77-79	B+	9	57-59	D+	3
73-76	B	8	53-56	D	2
70-72	B-	7	50-52	D-	1

Standing in a course is determined by the course instructor subject to the approval of the Faculty Dean. This means that grades submitted by an instructor may be subject to revision. No grades are final until they have been approved by the Dean.

Carleton E-mail Accounts

All email communication to students from the Department of Political Science will be via official Carleton University e-mail accounts and/or Brightspace. As important course and university information is distributed this way, it is the student's responsibility to monitor their Carleton University email accounts and Brightspace.

Carleton Political Science Society

The Carleton Political Science Society (CPSS) has made its mission to provide a social environment for politically inclined students and faculty. By hosting social events, including Model Parliament, debates, professional development sessions and more, CPSS aims to involve all political science students at Carleton University. Our mandate is to arrange social and academic activities in order to instill a sense of belonging within the Department and the larger University community. Members can benefit through our networking opportunities, academic engagement initiatives and numerous events which aim to complement both academic and social life at Carleton University. To find out more, visit us on Facebook <https://www.facebook.com/CarletonPoliticalScienceSociety/>.

Official Course Outline

The course outline posted to the Political Science website is the official course outline.
