

COURSE: PSYC 3000 A: DESIGN AND ANALYSIS IN PSYCHOLOGICAL RESEARCH

Instructor	Cecilia Jorgenson
Term	Summer 2020
Email Address	cecilia.jorgenson@carleton.ca

COURSE DESCRIPTION/INSTRUCTORS STATEMENT

This course builds on the material covered in PSYC 2002. You will review statistical tests such as t-tests, ANOVA and regression that were introduced in PSYC 2002 and gain a more in depth understanding these techniques. By the end of this course, you will have a good working knowledge of SPSS. This course will require you to calculate, by hand or SPSS, statistical tests and be able to interpret computer output generated by SPSS. Additionally, there will be a focus on communicating these results appropriately. The goal of this course is to provide you with the ability to understand and synthesise other researchers results along with your own. This will be excellent preparation for those students planning to complete either the honours project or an honours thesis.

EVALUATION

Weekly Online SPSS Assignments – 10% (1% each best 10 out of 12)

6 Online Assignments – 30% (5% each)

3 Online Exams – 30% (10% each)

Online Final Exam 30%

TEXT

The required textbook for this course is: Discovering Statistics using IBM SPSS Statistics (5th Edition) by Andy Fields. There is both a hardcopy or e-text version.
