COURSE DESCRIPTION/INSTRUCTORS STATEMENT

This course is an Introduction to human cognitive. The course will survey of cognitive theories, issues, methods and findings. Topics covered may include sensation, perception, pattern recognition, attention, imagery, learning, memory, language, thinking and applied cognition.

This is an asynchronous course consisting of pre-recorded lectures.

Assessment in this course is focused on the material covered in lectures. There are two midterm tests and a test in the final exam period. The tests are equally weighted, so each is worth 1/3 of the grade in this course.

All tests are ONLINE and will be multiple choice.

EVALUATION

Three online multiple choices tests (two during the term and one in the final exam period).

TEXT

Textbooks will be recommended but will be optional for this course.
