

FYSM 1310 F : CLOSE RELATIONSHIPS

Instructor	Cheryl Harasymchuk
Term	Fall and Winter (2025/2026)
Course Delivery	In-person
Email Address	Cheryl.Harasymchuk@carleton.ca
Office Location	SSRB 106D
Office Hours	TBA

COURSE DESCRIPTION/INSTRUCTOR'S STATEMENT

This course is intended as an introduction to psychology as the scientific study of people's thoughts, feelings and behavior. The special topic of the course is relationship science, that is, the study of close relationships (e.g., romantic relationships, friendships). In this course, students will learn how relationships are formed, maintained, and end. A special focus will be placed on social psychological theory and empirical approaches to the study of close relationships.

EVALUATION (SUBJECT TO CHANGE)

Evaluation will be based on several components including participation in the class (e.g., verbal participation, completion of small exercises, attendance), written assignments throughout the course (e.g., critiques), group work, and oral presentations. Classes will be held in-person (i.e., on campus). Regular class attendance is expected in this course.
