

PSYC 2001 E : INTRODUCTION TO RESEARCH METHODS IN PSYCHOLOGY

Instructor	Kim O'Neil
Term	Fall 2023
Course Delivery	Blended (asynchronous lectures, synchronous assessments)
Email Address	Kim.oneil@carleton.ca
Office Location	Virtual
Office Hours	By Appointment via Zoom

COURSE DESCRIPTION/INSTRUCTOR'S STATEMENT

This course is designed to provide a general introduction to research methodologies used in psychology. Students will be provided with the opportunity to learn how psychological research is conducted with topics to be covered including research designs, techniques, basic descriptive statistics, interpretation/reporting of research findings, and ethical issues. While this course is designed as an introductory course into research methodologies for students who are studying within the discipline of psychology, and who will someday conduct psychological research, other students are welcome to participate.

EVALUATION (SUBJECT TO CHANGE)

Midterm Exams 15% each (x2) TOTAL: 30%

Module Assignments 4% each (x9) TOTAL: 36%

SONA/WARP 4%

Final Exam 30%
