<b>Office Location</b>	106C Social Science Research Building
<b>Office Hours</b>	2:30pm-3:30pm Friday

### COURSE DESCRIPTION/INSTRUCTOR'S STATEMENT

Human Neuropsychology I-PSYC2307-B: Introduction to study of brain-behaviour relationships. Topics include a basic introduction to human neuroanatomy, an introduction to memory, language, attention, and executive functioning and how these cognitive domains are measured using both neuroimaging and neuropsychological techniques. Further exploration into the cognitive and neural basis for developmental, neurological, neurodegenerative, and neuropsychiatric disorders.

### EVALUATION (SUBJECT TO CHANGE)

2 Midterms (25% each) and 1 Final Exam (40%): Exams will consist of multiple choice and short answer questions (e.g., list the following, true or false, matching, fill-in-the-blank exercises, short essay questions, case studies).

Participation (10%): in-class reviews, discussion posts, and/or submission of exam questions

### TEXT

Research articles and relevant information will be provided to students. No text required.
