### COURSE DESCRIPTION/INSTRUCTOR'S STATEMENT

A follow-on course (from the prerequisite, PSYC2307) that delves deeper into the structure and function of the human cerebral cortex in both neurotypical and neurodivergent individuals. The first half of the course is a live lecture format covering topics presented by Dr. Tansley, with the second half consisting of student-led oral presentations and seminar discussions. Choice of student's oral presentation topic is done in collaboration with Dr. Tansley.

### EVALUATION (SUBJECT TO CHANGE)

Midterm exam 30% of course grade

Oral presentation 35% of course grade

Didactic Term paper (3000-5000 words with references on the oral presentation topic) 35% of course grade

### TEXT

The PSYC2307 Textbook (Kolb and Wishaw, 8<sup>th</sup> edition) is recommended background reading. In addition, ancillary readings will be provided for each lecture topic that can be downloaded from the course Brightspace partition.
