

PSYC 3506 A : COGNITIVE DEVELOPMENT

Instructor	Jordan Richard Schoenherr
Term	Fall 2024
Course Delivery	Online – Asynchronous
Email Address	Jordan.schoenherr@carleton.ca
Office Location	Zoom
Office Hours	TBD

COURSE DESCRIPTION/INSTRUCTORS STATEMENT

Intended for students interested in cognitive development. This course will provide you with the fundamental concepts, theories, and methods of cognitive development. The course will include a survey of the literature in selected topics examining how children's thinking changes over time due to biological, cognitive, and social factors. Research areas will include psychomotor skill development, perception, memory, decision-making, and metacognition as well as the application in learning. You will also a) analyze children's productions (drawing) and b) develop a cognitive model.
