

PSYC 5209 RESEARCH METHODS IN HEALTH PSYCHOLOGY

Course	PSYC 5209: Research Methods in Health Psychology
Instructor	Rachel Burns
Term	Winter 2025
Email Address	Rachel.burns@carleton.ca
Office Location	A503 Loeb
Office Hours	TBA

COURSE DESCRIPTION/INSTRUCTOR'S STATEMENT

Health psychologists are faced with multiple choices when designing a research study. This course will help students to thoughtfully navigate some of these choices by providing an overview of advanced topics and issues in research methods in health psychology. Topics may include hypothesis generation, objective and self-report measures, mediation and moderation, experimental and non-experimental design, and novel data sources.

EVALUATION

Evaluation will include seminar participation, leading discussions, short activities, and writing assignments.

TEXT

Readings will be made available on the course website.
