Description: (as in the Undergraduate Calendar) Cross-cultural survey of religious institutions, focusing on theories and methodologies in the study of religion. Topics may include myth, totemism, cults, ritual, belief systems, altered states of consciousness, new religious and/or new age movements and the relationship of religion with other social institutions and processes.

Rationale: This course is an introductory survey of anthropological approaches to the study of religion. It traces the historical development of the subdiscipline, reviews the major theoretical perspectives, reviews the basic conceptual vocabulary, and discusses some of the issues and problems in research methodology.

Learning Outcomes: This course aims to give students a broad understanding of the study of religion in society. Through the readings, videos, and selected case studies we investigate the role of religion in shaping society and how society, in turn, shapes religion. Students taking this course will have a greater understanding about how religion continues to play an important role in society.

Instruments of Evaluation: The Evaluation Procedures of the university are described in the Undergraduate Calendar. Final grades are subject to the Dean's approval and are not official until that approval has been received. There are four instruments of evaluation plus potential bonus marks.
