

School of Computer Science

Selecting an M.C.S Project Supervisor (COMP 5903)

For use by non-thesis option, students only

- Full-time students should have this form completed no later than the end of the second term of registration, part-time students no later than the end of the fourth term
- If a student cannot find a Project Supervisor, the student should see the Graduate Director as soon as possible
- If the Project Supervisor is outside the School of Computer Science, please specify who this person is, what department they are from, and their email address. A co-supervisor who is in the School of Computer Science must also be identified.
- Please ensure both parties read and understand the [Graduate Supervision-Responsibilities and Expectations Policy](#)

Student name: _____ Student #: _____

Student email: _____ Student signature: _____

Project topic: _____

- ***Please attach a detailed outline of the project, similar to a thesis proposal. The student and project supervisor must sign the attached plan. The student will be permitted to register in this course once the Graduate Director has approved the outline***
- Completion requires that a copy of the final paper be submitted to the Graduate Administrator for the file
