This position represents an opportunity for career-driven individuals seeking a position within an organization that inspires growth and promotes excellence to make a difference and contribute to CATSA’s unique culture as it strives to excel in air transport security.

If you are a team player who thrives in a fast-paced, collaborative and creative environment, we invite you to consider the following job opportunity:

**Student, Front-End Development**

**Why is CATSA a great fit for you?**

CATSA is a world leader in aviation security with a mandate to secure specific elements of the air transportation system – from passengers, to baggage, to airport workers. As a small, yet dynamic Crown corporation, it features a mix of public service and private sector culture, and offers a unique and energized work environment. CATSA encourages creativity and work/life balance, and is reflective of the varied background of its employees.

If you are a team player who thrives in a fast-paced, collaborative and creative environment, and you are looking for the next great adventure, CATSA is the place for you!

**Summary of responsibilities:**

CATSA requires an innovative student to join the Training and Certification Development team as Student, Front-End Development. Reporting to the Manager, Training and Certification Development, the Student, Front-End Development will contribute to the development of web-based training and solutions, and creation of interactive web-based learning and assessment tools. The Student performs all other duties and responsibilities related to the position as required.

**What you need to succeed**

**To qualify for the position, you must:**

- Have great working knowledge of Responsive Design, HTML5, CSS and JavaScript;
- Be familiar with consuming and implementing Web APIs;
- Be familiar in frontend web development;
- Be capable of producing a coded website from a PSD or mock-up image;
- Be diligent about documentation and logging time.
This position is best suited to individuals with the following skills and abilities:

- Ability to explain technical matters in a clear and concise language;
- Ability to anticipate needs and articulate solutions;
- Ability to plan and organize; work under tight timelines;
- Ability to communicate effectively orally and in writing;
- Ability to work independently as well as in a collaborative team environment.

Valuable skills include:

- Understanding of web technologies, protocols and systems (i.e. HTTP, REST, JSON, CMSs, CRMs, Mobile Web etc.);
- Experience with Bootstrap Startup;
- Knowledge of the Canadian Air Transport Security Authority (CATSA) organizational structure, mandate, priorities, operating environment and its interrelationships with other internal/external government and industry stakeholders will be considered an asset.

To qualify and to be considered for this employment, you must:

- Be enrolled in a college diploma or a university degree relevant to the duties of the position
- Be a Canadian citizen or permanent resident;
- Be eligible to obtain and maintain a secret security clearance

As an employer committed to a diverse workforce, we encourage candidates in designated groups - women, visible minorities, Aboriginal persons and persons with disabilities - to apply and self-identify by answering the questions on the online application form.

Candidates that meet all the position requirements, including the language profile, will be given first consideration.
