**Junior Software Developer**

Do you thrive in fast-paced technical environments and have a strong attention to detail? Are you eager to have a career where you are encouraged to meet your potential and have the opportunity to work for a prestigious company with an impressive global presence?

FDM is currently seeking a number of ambitious and driven candidates with the aptitude for IT to work as FDM consultants with our top clients, many of which are leading companies in the banking and financial services industry.

FDM creates and inspires exciting careers that shape our digital future. Through our Careers Program, we recruit and train those aspiring to become IT and business professionals before deploying them on to client sites worldwide. With centres across Europe, North America and APAC, FDM has shown exponential growth throughout the years, firmly establishing itself as an award-winning FTSE 250 employer.

We are currently seeking candidates interested in building a career in Software Development.

**Software Developers** work with a range of responsibilities, including: writing, developing, testing, and reviewing code; supporting existing applications; liaising with end users to fix defects, find solutions, and test them; adding functionality to applications by designing and implementing solutions; and more. FDM has trained and placed developers in specialties including Java, C#, COBOL, .Net, and more.

Prior to working with our clients, successful candidates will receive intense technical and professional training in FDM’s Toronto centre. You become an FDM employee from day one and are paid during the training period before placement onsite with our clients.

Fast-track career progression is a key focus of FDM, and our program will put you on a pathway that could grow into leadership roles working within multinational organizations.

Suitable candidates are encouraged to apply immediately at: https://apply.fdmgroup.com/displayjob.aspx?jobid=350&utm_medium=unijobad

There is no better way to launch your career than with FDM!

**Essential Criteria:**
- 4 year university degree (preferably in Computer Science, IT, Engineering, Mathematics, or similar)
