TO: Senate

FROM: Dr. Dwight Deugo, Vice-Provost and Associate Vice-President (Academic), and Chair, Senate Quality Assurance and Planning Committee

RE: 2022-23 Calendar Curriculum Proposals  
**Undergraduate and Graduate Major Modifications**

---

**Background**

Following Faculty Board approval, name changes and, as part of academic quality assurance, major curriculum modifications are considered by the Senate Quality Assurance and Planning Committee (SQAPC) before being recommended to Senate. Major curriculum modifications are also considered by the Senate Committee on Curriculum, Admissions and Studies Policy (SCCASP).

**Library Reports (as required)**

In electronic communication members of the Library staff, upon review of the proposals, confirmed no additional resources were required for the 2022-23 major modifications included below.

**Documentation**

Recommended calendar language, along with supplemental documentation as appropriate, are provided for consideration and approval.

**Omnibus Motion**

In order to expedite business with the multiple changes that are subject to Senate approval at this meeting, the following omnibus motion will be moved. Senators may wish to identify any of the following 19 major modifications that they feel warrant individual discussion that will then not be covered by the omnibus motion. Independent motions as set out below will nonetheless be written into the Senate minutes for those major modifications that Senators agree can be covered by the omnibus motion.

**THAT** Senate approve the major modifications as presented below.

## Program Requirements

### Admission

The normal requirement for admission to the Ph.D. program is a master's degree (or equivalent) in history, with a minimum average of A-.

A student already enrolled in the Carleton M.A. program in History or Public History who shows outstanding academic performance and research promise may be permitted to transfer to the Ph.D. ~~Admission Applicants with an M.A. degree will be expected to have at least high honours standing.~~ **program upon Applicants for the recommendation history of the History graduate committee Women, Gender and upon successful completion Sexuality program will be expected to have at least one of HIST 5003 together with 1.5 additional credits at the 5000-level, including at least 1.0 credit their earlier degrees in History or Public History. history.**

New Resources	No New Resources
Summary	<p>Revise PhD Admission requirements: 1) replace reference to high honours with a letter grade. 2) delete reference to Women, Gender and Sexuality. 3) add fast-track from MA to PhD.</p> <p>Existing calendar language to be replaced: "Applicants with an M.A. degree will be expected to have at least high honours standing. Applicants for the history of Women, Gender and Sexuality program will be expected to have at least one of their earlier degrees in history."</p>
Rationale for change	1) The letter-grade scale better reflects actual practice than 'high honours,' which in most institutions does not exist at the MA level. 2) The department no longer has a PhD program

in Women, Gender and Sexuality. 3)The early-admittance language reflects Carleton's "Fast-Track" option for PhD admissions for in-program MA students.

Transition/Implementation No impact if applied.

Summary Add a new MSc program.

Rationale Chemical science increasingly relies on computing to analyze large experimental data sets, predict the properties of new molecules and materials, and understand the activity of complex chemical systems. The use and development of these methods requires training in the theory, programs, and algorithms of the broader field of data science. Students who

complete this program will gain expertise in the application of data science to chemical science in addition to being trained in modern chemical research. The program retains core faculty who can supervise students in the proposed specialization.

Transition/Implementation None.

Hi Dan,

Thanks for your email. I have been involved in the development of the Chemistry specialization in Data Science, and I strongly recommend that it be implemented by Grad. Studies. The logistics involved have been discussed, and we don't expect any problem with the administration of the Data Science specialization

Summary Add Collaborative Specialization in Climate Change to M.A.Sc. Engineering

Rationale Collaborative specialization in climate Change (CSCC) is a multi-disciplinary initiative across different faculties on campus, and we believe civil engineering program is well suited to join this. However, following discussions and concerns regarding potential dilution of civil engineering content, it has been decided these programs will be 6-credit (unlike the other Master's programs in civil Engineering which are 5.0 credit). The other programs offered by the department (ENVE, BLDG) are already participating in CSCC. The program retains core faculty who can supervise students in the proposed specialization.

New Resources	No New Resources
Summary	Adding a collaborative specialization in climate change for both the coursework and thesis options within the MA in Economics.
Rationale	This specialization will provide a unique interdisciplinary learning experience on a variety of topics related to climate change. The unit retains core faculty that can supervise in the proposed specialization. The program's course offerings include sufficient content relevant to the climate change specialization.
Transition/Implementation	No impact. The elective courses are already offered as part of our graduate program electives in the area of environmental, natural resources, and energy economics.

Program reviewer comments	<b>sandrabauer (11/10/21 2:22 pm):</b> In Item 6, change reference to 'preceding list' to Item 5, per P&P

Summary This proposal adds the Geography MA program to the cross-faculty Collaborative Specialization in Climate Change

Rationale Geography MA students investigate how elements of place, space and environment interact with one another to explain human activities. We anticipate several of our new MA students will chose to participate in this program and carry out climate change related research. The unit retains core faculty that can supervise students enrolled in the proposed specialization.

Transition/Implementation CLIM courses are implemented by collaborating faculties. No new resources required at the Departmental level.

Summary	This proposal adds the Geography MSc program to the cross-faculty Collaborative Specialization in Climate Change
Rationale	Geography MSc students study environmental processes, patterns and change linked to human impacts on climate, ecosystems and resources. We anticipate several of our new MSc students will chose to participate in this program and carry out climate change related research. The program retains core faculty who can supervise students in the proposed specialization.

Summary The addition of a new specialization in Climate Change in the MA in Migration and Diaspora Studies

Rationale The addition of the collaborative specialization in African Studies, Latin American and Caribbean Studies, and Climate Change was approved by the MDS Committee of Management in July 2021. The rationale for adding these specializations is there is strong student interest in these areas (among applicants and current students). The interdisciplinary program retains associated faculty who can supervise students in the proposed specialization. The program's course offerings include sufficient content relevant to the specialization.

Transition/Implementation N/A

Summary	Add Specialization in Climate Change
Rationale	As an interdisciplinary program, it is beneficial to our current and future students to add options to the MA Political Economy program. A specialization in climate change is needed with the current climate crises. The interdisciplinary program retains cross-appointed faculty who can supervise students in the proposed specialization.

Summary Add M.A. Psychology with Collaborative Specialization in Climate Change

Rationale We are influenced by the physical environment and our actions shape the environment in which we live. This specialization focuses on the interaction between the environment and

human beings, examining how the physical features of the environment impact our cognition, behavior, and well-being, and how our actions in turn produce immediate and long-term consequences on the environment. As such, psychology fits nicely within this specializations. Moreover, we have a number of faculty (e.g., Zelenzki, Peetz, Milyavskaya, Wohl) who are currently conducting or are planning to conduct research on the psychology of climate change (and climate change denial). Their graduate students would be well served to take this Specialization. However, a number of graduate students who are not directly doing research on climate change have expressed interest in this Specialization. In short, the Department of Psychology believes this Specialization will be popular among its graduate students.

Summary

Add Collaborative Specialization in Climate Change

Rationale

We would like students in the M.A. Sustainable Energy program to be able to add the Collaborative Specialization in Climate Change to their program if they would like to. The interdisciplinary program retains core faculty who can supervise students in the proposed specialization. The program's course offerings include sufficient content relevant to the climate change specialization.

**Subject:** Re: Climate Change Specialization

Hello Dan,

I have reviewed the proposed calendar changes to add the following programs to the Collaborative Specialization in Climate Change (CSCC):Sustainable Energy starting in the Fall of 2022:

Anthropology  
Architecture  
Economics  
Geography  
Migration and Diaspora Studies  
Political Economy  
Psychology  
Civil Engineering  
Geography

I have also sought feedback from the CSCC governance committee. The committee has no concerns about any of these proposals. All are appropriate additions to the Specialization, and as such I am writing this as an unqualified endorsement of the proposals.

Please let me know if this email will suffice, or if you would like a more formal letter expressing my support.

Best,  
Ron Miller  
Program Coordinator, CSCC.

Summary Add coursework pathway.

Rationale for change This is a requirement from the specialization that was missed when we submitted initially our proposal to join the specialization. We'd like to add the course-based option, with the slight modification proposed above. The unit retains core faculty that can supervise student theses and teach courses in the field of climate change.

New Resources	No New Resources
Summary	The addition of a specialization in Latin American and Caribbean Studies in the MA in Migration and Diaspora Studies.
Rationale	The addition of the collaborative specialization in African Studies, Latin American and Caribbean Studies, and Climate Change was approved by the MDS Committee of Management in July 2021. The rationale for adding these specializations is there is strong student interest in these areas (among applicants and current students). The interdisciplinary program retains associated faculty who can supervise students in the proposed specialization. The program's course offerings include sufficient content relevant to the specialization.

Dear Dan,

Thank you for touching base.

Yes, we are aware. The new additions were done in consultation with LACS and all is good.

Hi Audra and James,

I wanted to alert you to a proposal on my plate. Communication and Migration & Diaspora Studies are adding your specialization to their Master degrees. I was hoping that you guys could shoot me an email acknowledging that you are aware of this and that these new additions won't cause any issues to the administration of the specialization.

Thanks,

Dan

New Resources

No New Resources

Summary

1. Introduce Thesis pathway for the MA SERG
2. Format existing research essay and coursework pathways into standard calendar format (editorial)

Item 1: Replace 1.0-credit Applied Interdisciplinary Project SERG 5004 with 0.5 credit SERG 5005. rather than 1.0 credits.

Item 6: Increase 1.5 credits in sustainable policy electives to 2.0

Rationale for change

1. This allows students in the MA Sustainable Energy program to do a thesis if they would like to. Item 1 and 6: it is sufficient for the Applied Interdisciplinary Project to be 0.5 credit.

Transition/Implementation

No impact.

## New Resources

## Summary

Delete the Minor in Performance in the Public Sphere.

## Rationale for change

Although this program was conceived with the best intentions, it was difficult to gain momentum during the public health emergency, and participating units are no longer able to provide resources to the level imagined in the original plan. It has become clear that staffing the core courses will be very difficult given staffing changes and changes in priorities across the participating units.

Transition/Implementation None

Summary	Make practica course descriptions uniform across our programs
Rationale for change	The proposed change in course description is to broaden the scope of experiential opportunities available to students through practica. There are two reasons for this. First, the current focus of the departmental practicum courses is on work positions and job experience. However, not all

students are comfortable undertaking such placements while others are not interested in gaining job experience as part of their undergraduate studies either already having such experience or when post-graduation plans do not include securing a professional job. Second, new community-focused opportunities are being identified both through direct departmental faculty engagement with community organisations and through the work of the Committee on Community Engagement in keeping with the university's overall prioritising of community engagement. Some students may find the option of working with a community organisation either alone or on a team of students a more meaningful experience that is in keeping with their interests and/or post-graduation plans.

Summary	Make course descriptions for practicum courses uniform across our programs.

**Rationale for change**

The proposed change in course description is to broaden the scope of experiential opportunities available to students through practica. There are two reasons for this. First, the current focus of the departmental practicum courses is on work positions and job experience. However, not all students are comfortable undertaking such placements while others are not interested in gaining job experience as part of their undergraduate studies either already having such experience or when post-graduation plans do not include securing a professional job. Second, new community-focused opportunities are being identified both through direct departmental faculty engagement with community organisations and through the work of the Committee on Community Engagement in keeping with the university's overall prioritising of community engagement. Some students may find the option of working with a community organisation either alone or on a team of students a more meaningful experience that is in keeping with their interests and/or post-graduation plans.

**Course reviewer comments**

**nataliephelan (10/06/21 11:55 am):** Rollback: Per Quality Assurance, changes to practicum courses need to go through the major mod workflow, so I will adjust it and resubmit for the appropriate GEOG, GEOM, and ENST courses.

**nataliephelan (10/06/21 11:58 am):** Re-approving on behalf of GEOG Chair, after rolling course back to originator in order to modify the workflow.

## MEMORANDUM

**To:** Senate Quality Assurance and Planning Committee (SQAPC)

**From:** Anna Hoefnagels, School of Indigenous and Canadian Studies

**CC:** Dean Pauline Rankin and Associate Dean Peter Thompson

**Date:** September 24, 2021

**Subject:** Major Modification to Canadian Studies, Track A2

---

### **Modification Description**

The proposed modifications to the BA in Canadian Studies largely involve updating calendar descriptions of courses, augmenting options to complete a second language requirement and a fine-tuning of program requirements to reflect the new course descriptions and priorities in the School. All proposed changes are informed by internal discussions and agreement within the School membership and account for recommendations offered by the external reviewers of the most recent (2020-21) Cyclical Program Review of the BA and MA.

Please see the attachments appended to this document:

- 1) Appendix A: Updated Calendar Descriptions: Canadian Studies BA Degrees
- 2) Appendix B: Overview of Canadian Studies BA Degrees
- 3) Appendix C: Approved Electives for Canadian Studies

Members of the School have identified as a priority the need to update calendar descriptions and degree requirements of Canadian Studies courses to reflect shifts in the discipline and in Canadian society more generally.

Two main recommendations of the external reviewers are addressed through the proposed changes 1) a closer examination of the Ottawa/Gatineau/Odawang area as a contested space and having students engage with local institutions; and 2) clarification on language requirements.

**Changes to the program structure** include the following:

- 1) Specificity and an increase in required first-year courses in order to provide all Canadian Studies majors with the same foundational training in Canadian Studies
  - a. CDNS 1001 [0.5]: Introduction to the Study of Canada
  - b. CDNS 1101 [0.5]: Power, Place and Stories in/of Odawang/Ottawa
  - c. INDG 1011 [0.5]: Introduction to Indigenous-Settler Encounters
- 2) Increasing required second-year courses from 0.5 to 1.5 to provide grounding in central issues in Canadian Studies:
  - a. CDNS 2000 [0.5]: Debating Canada
  - b. CDNS 2001 [0.5]: Canada and Global Issues
  - c. CDNS 2002 [0.5]: Language, Culture and Power
- 3) Increasing required third-year courses from 0.5 to 1.0 to provide solid grounding in research methods:
  - a. CDNS 3000: Situating Research in Indigenous Studies and Canadian Studies

- b. CDNS 3020: Practicing Research Practices in Indigenous Studies and Canadian Studies
- 4) Revisioning electives in Canadian Studies to include more content on racialization, im/migration, and diaspora studies while continuing to offer robust programming for minors in heritage conservation and Québec Studies.
  - 5) Changing the language requirement so all degree students must fulfil 1.0 credit of language study and complete the required 0.5-credit CDNS 2002: Language, Culture and Power course. This change in approach to language studies in Canadian Studies speaks to the School's goal of moving away from an uncredited internally-vetted French exam or evidence of proficiency in a language other than English to instead explore how language is connected to power and politics and informs world views from different cultural perspectives. The intention of this language requirement is to explore the colonial framework of much scholarship in Canadian Studies as it is written in English and/or French and encourage students to engage in language instruction in other languages, including various First Peoples' languages and other global languages.

**Delivery:** The delivery of the Canadian Studies program is largely unchanged; the majority of courses are to be offered in-person (pending resolution of COVID19 restrictions) with some electives offered online. Students can complete practicum placements.

**Impact on Other Programs:** The impact of the proposed changes to Canadian Studies programming on other programs will be minimal. Many of our courses are identified as approved electives in a wide range of sister disciplines; we believe these updated courses will have even greater appeal to students in other programs.

**Student Demand:** Student interest in an updated curriculum in Canadian Studies is largely anecdotal, yet consensus is that what is taught in Canadian Studies courses is usually much more interesting and relevant than what is described in the calendar descriptions. Similarly, faculty believe that revising the language requirement for degrees from the specification of French to a second language better reflects the revised curriculum and will appeal to students for whom proficiency in French has been an obstacle to fulfilling their degree requirements. Some breadth in linguistic capacity, and a curriculum designed to foster understanding that different ontologies are evident in languages, will give students an appreciation for alternate world views, the links between language and power, an understanding of the experiences of linguistic minorities in Canada and a connection to the global world.

**Resources:** Changes in programming are largely resource neutral as faculty in the School have the expertise to teach these courses and the School is well-supported by its administrative staff. However, as recommended in the External Reviewers' Report for the CPR, the School desires the permanent hiring of a racialized faculty member to diversify the faculty complement in Canadian Studies. We anticipate collaboration with sister units and drawing on expertise of other faculty where appropriate.

- a. *Faculty resources:* Although additional faculty are not required to enact the proposed changes to Canadian Studies programming, the School recognizes the urgency in engaging racialized faculty members and senior doctoral students at Carleton to diversify the faculty teaching complement in Canadian Studies. The School will seek appointment of a new colleague through the faculty's internal allocation process, as recommended by the external reviewers of the Canada Studies CPR, but until such a position is secured, we will work with sister units to support the diversification of our teaching faculty.
- b. *Contract instructors:* with the stream-lined curriculum and existing faculty complement, delivery of the program will not require additional contract instructors.
- c. *Administrative support:* the changes in programming will not impact on the workload of administrative staff.

- d. *Library resources*: a Library Report will be requested by FGPA (graduate programs) or OVPAVPA (undergraduate programs); however, the School is already well-supported by the library and these proposed changes will have no significant impact on library resources
- e. *Space*: additional space will not be required for the modifications in the programming
- f. *Equipment*: additional equipment will not be required for the modifications in the programming
- g. *Graduate student funding*: Changes to programming apply only to the undergraduate programs in Canadian Studies

## Institutional Quality Assurance Process

### Major Modifications Not Requiring a Library Report

*Date:* September 15, 2021

*From:* Alana Skwarok, Collections Librarian, Arts & Social Sciences

*To:* Robyn Green, Program Officer, Faculty of Arts and Social Sciences/Faculty of Science

*cc* Amber Lannon, University Librarian  
Laura Newton Miller, Head, Collections & Assessment  
Sally Sax, Head, Electronic Resources & Acquisitions  
Patti Harper, Head, Research Support Services

#### Recommendation

After review of Carleton University Library's information resources and services, no additional Library resources are required and so no report from the Library is necessary for the QA process for the major modifications of the following programs:

- Canadian Studies, Track A2

## New Resources

Summary	Cancel the Earth Science and Geography: with a concentration in Terrain Science program
Rationale for change	Based on low to no enrollment over the last few years and because the Physical Geography program is the exact same as the Terrain Science, we would like to cancel this program.
Transition/Implementation	We have a few students finishing out the program and will advise them of the change, however there is the Physical Geography program that offers and/or requires the exact same courses as the Terrain Science, so there is an alternate program available should students need it.

Unpaid Placement	Yes
Summary	Change in the required Grade point average to include the overall and major of the degree.  Oct 26/21: rolled back to initiator and changed workflow to major mod.
Rationale for change	The placements are competitive opportunities and require strong, well rounded students. We feel that having a CGPA requirement of 9 in both the overall and major requirements is more reflective of the student's overall successes in the program.

### Language Requirement for B.P.A.P.M.

Prior to graduation, students must satisfy a language proficiency requirement in one of the following ways:

1. successful completion of an approved French language credit ([FREN 1100](#));
2. placement at a demonstrated competency level equivalent to satisfactory completion of [FREN 1100](#) following a self-assessment questionnaire and interview administered by the Department of French (for students who already possess demonstrated capacity in French).

Students should note that they will be required to use one of their elective credits if they choose to satisfy the language requirement through an approved French language credit. Students registering in the Specialization in International Studies should note the additional language requirement.

Summary	<p>This text is already included on the main program page but I don't have access to submit changes to it so we are submitting it as a major change. Minor changes to the BPAPM language requirement to ensure all students leave the program with the same level of French language training.</p>
Rationale	<p>The majority of our graduates work in the federal public service, in which bilingualism is a requirement for more than 40% of jobs, and desirable in other positions. Although the French language requirement will not make students bilingual, it is an essential first step to enable students to undertake further training in future. Focus groups of program alumni and upper-year students, undertaken as part of program review, have emphasized the importance of French-language skills for program relevance. We wish to ensure that all students, regardless of specialization, graduate from the program with a basic level of French. We are removing the bilingual certificate or French immersion requirement in favour of a determination by the Department of French that what is covered in certificates or immersion may vary across provinces and countries, and we wish to ensure a common standard.</p>

## STATEMENT OF SUPPORT

RE: Change in the French language requirement for the Public Affairs and Policy Management (PAPM) program

I support this change unconditionally.

I do not support this change.

I support this change, with the following reservations:

Signature:

Name: Carmen L. LeBlanc

Title: Chair

Academic unit: French

Date: 17 dec.

2021

Notes: The Department of French has determined that it can accommodate the proficiency evaluation for the additional intake of 25-35 students per year this change will result in.

### Departmental Language Requirement

The Department of Political Science requires Honours students to demonstrate basic proficiency in at least one language other than English, normally French. Honours students are required to demonstrate such proficiency, normally through the completion of 1.0 credit at the 1000-level or higher in one language offered at Carleton.

For students who consider that they already have proficiency in French, the Department of Political Science conducts a French language examination twice a year, in November and February. For students who consider themselves proficient in a second language other than French, arrangements may be made to examine the student in that language, depending on faculty resource availability. Departmental language examinations may not be repeated in case of failure. Students whose high school transcript shows the primary language of instruction to be other than English may apply to have the examination requirement waived. For students in the Canadian concentration, French must be used to satisfy the language requirement.

#### Summary

NP June 18/21: submitted on behalf of Political Science dept. Minor wording change to the department's language requirement policy.

#### Rationale

The current calendar wording predates changes made to 1000-level language courses in the French department and in SLALS. Whereas in the past most introductory language courses were offered only as 1.0 full credit courses, they are now offered as two separate half-credit courses. This means that current students can fulfil the language requirement with an introductory 0.5 credit language course. However, a half-credit introductory course is an insufficient demonstration of basic proficiency and does not fulfil the intent of the language requirement. The provision that language tests in languages other than French to be offered twice a year at the same time as the French exams is removed to allow for greater flexibility in arranging for faculty to run the exams.
