GBA-A12	European and Russian Studies BA General	Edited	EURR	<p>General; BGINS Specialization and Stream, Minor) will draw on the same categories on the EURUS Approved Courses list. This structure also names the categories making it clearer in the calendar language what the objective of the requirement is (already the practice with our BGINS specialization, but not with our BA). The labeling will also make more transparent how each category maps onto the program-level learning outcomes. The expectation is that this restructuring will also reduce the administrative load for calendar changes, since additions or deletions to the various categories only need to be made from one list rather than changing the equivalent requirement in each separate program. In terms of the program structure, the programs draw on the same sequence of core courses, and the requirements for “Modern History” and “Politics and Economics” remain largely the same as existing categories (the PSCI course titles are updated with proposed changes in language for the next round of calendar changes). What is new are the categories for “Language, Art, Culture” and “Contexts and Method for Regional Studies.” For the BA Honours, students are required to take 0.5 credit from both new categories. For the BA Combined Honours and BGINS Specialization, the Contexts and Methods is not required since Combined Honours have another discipline and BGINS</p>
