Title	R-UG-3.2.4 The Cumulative Grade Point Average

Program Requirements

3.2.4 The Cumulative Grade Point Average

The Cumulative Grade Point Average (CGPA) is the key assessment tool for graduation and/or eligibility to continue in a degree program. The CGPA is the ratio of the grade points earned on a set of courses to the total credit value of these courses. In calculating the CGPA, the grade points contributed by each course are multiplied by the credit value of the course. For example, A+ is equal to 12.00 grade points. For a 0.5 credit course, it is equal to 6.00 grade points (12/2). The CGPA is truncated to two decimal places (with no rounding).

The overall CGPA includes all courses that satisfy requirements of the student's program or would have satisfied such requirements if a passing grade had been obtained. In particular, an F grade is included in the calculation until it is removed through course repetition or replacement.

When a course is repeated, the best grade is used in the CGPA calculation. ~~used.~~ The best grade rule applies to direct repeats and cross-listed courses. It does not apply to precluded courses (for a definition of precluded courses, see Section 2.1.9). For ~~Some exceptions for~~ those in the Bachelor of Engineering, some exceptions to ~~Engineering apply (https://calendar.carleton.ca/undergrad/undergradprograms/engineering/#regulationstext). All Carleton credits counting toward advanced standing in~~ the best grade rule apply. ~~degree program are included in the CGPA calculation.~~ Students must refer to the Bachelor of Engineering program regulations for details.

All Carleton credits counting toward advanced standing in the degree program are included in the CGPA calculation. All credits obtained through the University of Ottawa Exchange agreement are included in the CGPA calculation.

Courses Extra to the Degree (ETD), No Credit for the Degree (NCD), Satisfactory (SAT), Withdrawn (WDN), Unsatisfactory (UNS), or Forfeit are not included in the calculation of the CGPA.

A CGPA calculated for a program component, such as Major or Core, is calculated in the same way using only the courses in the program element.

3.2.4.1 Term Grade Point Average

The Term Grade Point Average (GPA) is the ration of the grade points earned on a course or set of courses to the total credit value attempted in an individual term. The Term GPA is calculated on all courses attempted in the term, regardless of whether said courses can be used to satisfy the student's program requirements. Accordingly, these courses can include, but are not limited to: program credits, courses set aside, courses excess to the degree, repeated courses.

New Resources	No New Resources
Summary	Drafting some new wording to emphasise best grade and its application.
Rationale for change	The RO has fielded inquiries from students and staff about the scope of best grade, particularly in the context of precluded courses. This language makes it explicit that the rule

does not apply to pairs of precluded courses.

Transition/Implementation	N/A - language change only.
