

FED Undergraduate Student Statements of Candidacy

1) **Jaden Desveaux**

- Carleton Mechanical and Aerospace Society 3rd-year Representative
- MAE Department Student-Faculty Council – Student Representative

I'm running to be a Student Representative on the Carleton Senate to continue to advocate for students and raise awareness to pertinent issues facing students. As my time as CMAS 3rd Year Rep I helped create the MAE Department Student-Faculty Council which allows student representatives to directly engage with faculty. I hope to use this experience to better represent students and bridge the gap between faculty and students.

2) **Xavier Haziza**

- President of Mechanical and Aerospace Society
- Carleton Student Engineering Society Councillor

I have been very involved in student governance and would like to take my voice to the school and senate level. As the president of the mechanical and aerospace society I have the best interest of the students I represent and the entire FED student body at heart. I will continue to fight for students rights.

3) **Alexandria MacDonald**

- SREE A Rep on Carleton Student Engineering Society and on CASG (2023-24, 2020/21)
- Carleton Student Engineering Society VP Services (2021/22)
- SREE Society VP Academic (2023-24)

Throughout my university and extracurricular career, I have strived to advocate for students' academic concerns in the Sustainable and Renewable Energy Engineering Program and FED as a whole. I have served twice as the SREE A Councillor on CSES and CASG (2020/21 and 2023/24), and once as the FED Faculty coordinator for CASG (2022/23), where I have ensured all decisions are adequately critiqued and justified, such that they serve in the best interest of my constituents.

In the last year, I have also served on the Senate, liaising with the other student senators to preserve the larger student voice and interest.

Through a continued term in Senate, I hope to continue advocating for student concerns, while working towards building a transparent process of communicating relevant changes to the student body.

4) **Mircea Preotesoiu**

- President, Systems & Computer Engineering Society
- CSES - Computer Systems Engineering Program Representative
- CASG – Computer Systems Engineering Councilor

Hello, my name is Mircea Preotesoiu I am a second-year Computer Systems Engineering student and I would love to be part of the Senate this upcoming year. I want to advocate for engineering students who are underrepresented in major advocacy positions within the university.

I am currently the Systems and Computer Engineering (SCESoc) President, The Carleton Student Engineering Society (CSES) Computer Systems Program Program Representative and by extension the Carleton Academic Student Government (CASG) Computer Systems Engineering Councilor. Because of these positions, I have a seat on the Engineering Faculty Board and the Systems and Computer Engineering (SCE) Department Board as a student representative. In addition to that, I also have done academic advocacy for students within the SCE department and have experience voicing the concerns of students.

As a Senator, I would like to make myself accessible so students can raise concerns or questions to me so they can be brought forward to the Senate or relevant faculty.
