**ASIAN MIGRATIONS AND DIASPORAS**

**Course Description**

Advanced study of Asian migrations and diasporas. We focus on three broad themes empirically and analytically: 1) sociological patterns of Asian migrations and diasporas; 2) structural conditions that shape Asian migrations and incorporation in the racial hierarchy in Canada, including imperialism and colonialism in the Asia-Pacific, Canadian settler colonialism, anti-Asian racism, capitalist extraction and expansion, current geopolitics. 3) Asian Canadians' myriad of reactions such as internalization, circumvention, or resistance to hegemonic terms of belonging and citizenship politics.
