Our organization is excited to announce upcoming contract opportunities for social workers interested in working with indigenous communities in northern Ontario, that we are hoping to share with your staff and faculty members, graduating social work students, and alumni.

Dalton Associates offers psychological and mental health counselling, psychological assessment services, psychological and mental health rehabilitation services, and autism and behavioural services; all led by mental health professionals. In recent years, we have developed several partnerships with organizations, corporations, government agencies, and communities to ensure greater accessibility of psychological and mental health services in the province.

Specifically, over the past two years, we have been honoured to develop strong partnerships with indigenous communities and regional councils in northern Ontario to support the development of regional and local mental health and wellness programs that are tailored to the unique needs of the communities. These partnerships have included direct clinical services (psychological assessments and counselling services), as well as mental health program development that take a community-led, capacity-development and resilience-building approach.

As our partnerships with these communities continue to develop, we are looking for qualified social workers to join our team. Preference will be given to social workers with personal and professional knowledge and experience working with indigenous communities.

More specific information is available; we would happy to meet with in-person to discuss the opportunities in greater detail. Please let us know if you have any questions.

Kindest Regards,
Michelle
