

Student Academic Success and Skill Development

Experiential learning and immersive technologies are poised to have a transformational impact on the student experience at Carleton and are essential to producing graduates that are engaged citizens ready to tackle global challenges. Through the Future Learning Lab and Experiential Learning Hub, we promote teaching approaches that reduce barriers to engagement and encourage a sense of belonging, empowering students to take control of their own learning and development.

Digital Teaching and Learning

We support instructors with implementing a variety of educational technologies, encouraging creative and high-impact teaching practices using modern tools. We also provide frontline technical support for classroom instruction, ensuring these learning spaces are welcoming and inclusive.
